The sets of numbers given in the alternatives are represented by two classes of alphabets as shown in the given two matrices. The columns and rows of **Matrix-I** are numbered from 0 to 4 and that of **Matrix-II** are numbered from 5 to 9. A letter from these matrices can be represented first by its row and next by its column, for example, **'Z'** can be represented by 87, 99, etc., and **'T'** can be represented by 69, 95, etc. Similarly, you have to identify the set for the word **"MAZE"**.
