Nursing Staff Grade 1 Exam 24 Aug 2018

Participant ID	
Participant Name	
Test Center Name	
Test Date	24/08/2018
Test Time	9:00 AM - 12:00 PM
Subject	Nursing Staff Grade 1
Marks Obtained	

Section : Nursing Staff Grade 1

Q.1 All stages of rashes are seen simultaneously in:

- Ans
- ☒ 1. Typhoid
 - ☒ 2. Small pox
 - ☒ 3. Measles
 - ☒ 4. Chickenpox

Question ID : 47694398
Status : Answered
Chosen Option : 4
Marks : 1.00

Q.2 A newborn is presented with a bloated abdomen shortly after birth with passing of less meconium. A full thickness biopsy of the rectum was carried out. Which one of the following rectal biopsy findings is most likely to be present?

- Ans
- ☒ 1. Fibrosis of submucosa
 - ☒ 2. Lack of ganglion cells
 - ☒ 3. Thickened Muscularis propria
 - ☒ 4. Hyalinisation of the muscular coat

Question ID : 47694367
Status : Answered
Chosen Option : 1
Marks : -0.25

Q.3 The nurse, recognising that digitalis preparations promote diuresis, should evaluate patients for a depletion of:

- Ans
- ☒ 1. Sodium
 - ☒ 2. Potassium
 - ☒ 3. Phosphate
 - ☒ 4. Calcium

Question ID : 47694382
Status : Answered
Chosen Option : 2
Marks : 1.00

Q.4 All of the following are vector borne diseases, EXCEPT:

- Ans
- ☒ 1. Malaria
 - ☒ 2. Filariasis
 - ☒ 3. Plague
 - ☒ 4. Hepatitis

Question ID : 47694395
Status : Answered
Chosen Option : 4
Marks : 1.00

Q.5 The best method for early diagnosis of cervical cancer is:

- Ans
- ☒ 1. HPV Vaccine
 - ☒ 2. PAP Smear
 - ☒ 3. Health education
 - ☒ 4. Colposcopy and biopsy

Question ID : 476943151
Status : Answered
Chosen Option : 2
Marks : 1.00

Q.6 Which of the following is the method for managing foreign body airway obstruction?

- Ans
- ☒ 1. Valsalva maneuver
 - ☒ 2. Epley maneuver
 - ☒ 3. Heimlich maneuver
 - ☒ 4. Jaw thrust maneuver

Question ID : 47694326
Status : Answered
Chosen Option : 3
Marks : 1.00

Q.7 Which part of the mind is associated with practical reality principle?

- Ans
- ☒ 1. Hyper-ego
 - ☒ 2. Id
 - ☒ 3. Super-ego
 - ☒ 4. Ego

Question ID : 476943140
Status : Answered
Chosen Option : 4
Marks : 1.00

Q.8 The coverage of the population by primary health centres (PHC) in plain areas is:

- Ans
- ☒ 1. 40,000
 - ☒ 2. 30,000
 - ☒ 3. 5,000
 - ☒ 4. 20,000

Question ID : 476943177
Status : Answered
Chosen Option : 2
Marks : 1.00

Q.9	The approximate increase in length in the first year of life is:	Question ID : 476943132 Status : Answered Chosen Option :1 Marks : -0.25
Ans	1. 12 cm 2. 22 cm 3. 25 cm 4. 35 cm	
Q.10	When toddlers move around on their hands keeping their abdomen off the floor, it is called:	Question ID : 476943138 Status : Not Answered Chosen Option :-- Marks : 0.00
Ans	1. Creeping 2. Crawling 3. Squirming 4. Rolling	
Q.11	False sensory perceptions with no basis in reality are known as:	Question ID : 476943139 Status : Answered Chosen Option :3 Marks : 1.00
Ans	1. Illusions 2. Delusions 3. Hallucinations 4. Loose Associations	
Q.12	In ECG, the P wave represents:	Question ID : 47694311 Status : Answered Chosen Option :2 Marks : 1.00
Ans	1. Atrial repolarisation 2. Atrial depolarisation 3. Ventricular depolarisation 4. Ventricular repolarisation	
Q.13	The taxonomy of educational objectives was presented in 1956 by:	Question ID : 476943169 Status : Not Answered Chosen Option :-- Marks : 0.00
Ans	1. Socrates 2. Benjamin S Bloom 3. BF Skinner 4. Max Webber	
Q.14	All of the following viruses are transmitted by respiratory route EXCEPT:	Question ID : 47694344 Status : Answered Chosen Option :1 Marks : 1.00
Ans	1. Rota virus 2. Influenza virus 3. Rhinovirus 4. RSV	
Q.15	Which of the following drugs is used for the treatment of nocturnal enuresis?	Question ID : 47694355 Status : Answered Chosen Option :3 Marks : 1.00
Ans	1. Sertraline 2. Chlorpromazine 3. Imipramine 4. Trazodone	
Q.16	The doctor has prescribed 2.5 mg of Haloperidol for an agitated patient. The medication is labeled haloperidol 10 mg/2 ml. The nurse prepares the correct dose by drawing up how many milliliters in the syringe?	Question ID : 47694353 Status : Answered Chosen Option :1 Marks : 1.00
Ans	1. 0.5 2. 0.4 3. 0.3 4. 0.6	
Q.17	Normal respiration is also called:	Question ID : 47694333 Status : Answered Chosen Option :1 Marks : 1.00
Ans	1. Eupnea 2. Apnea 3. Dyspnea 4. Orthopnea	
Q.18	The minimum age for marriage of girls in India according to the National Population Policy is:	Question ID : 476943174 Status : Answered Chosen Option :1 Marks : 1.00
Ans	1. 18 years 2. 22 years 3. 16 years 4. 20 years	

Q.19	Venereal Disease Research Laboratory (VDRL) test is used to diagnose:	Question ID : 47694349 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	1. Tuberculosis 2. Syphilis 3. Pneumonia 4. AIDS	
Q.20	The part of the mind that distinguishes right from wrong and acts as a censor of behaviour is known as:	Question ID : 476943149 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	1. Ego 2. Libido 3. Super-ego 4. Id	
Q.21	Polyvalent vaccines consist of:	Question ID : 476943102 Status : Answered Chosen Option : 4 Marks : -0.25
Ans	1. a single species 2. more strains of the same species 3. a single organism 4. more strains of different species	
Q.22	Eugenics means:	Question ID : 47694393 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	1. Genetic preventive measures 2. Improvement of genetic endowment 3. Genetic counseling 4. Improvement of environment	
Q.23	The philosophy of education in which treatment of things is based solely on their practical utility is called _____.	Question ID : 476943171 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. naturalism 2. idealism 3. realism 4. pragmatism	
Q.24	Which one of the following is NOT the psychological principle of teaching?	Question ID : 476943170 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. Proceed from complex to simple 2. Proceed from simple to difficult 3. Proceed from known to unknown 4. Proceed from concrete to abstract	
Q.25	When performing an abdominal assessment, in which order are the given steps followed?	Question ID : 47694323 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Palpation, inspection, percussion, auscultation 2. Inspection, percussion, palpation, auscultation 3. Percussion, auscultation, inspection, palpation 4. Inspection, auscultation, percussion, palpation	
Q.26	Which statement by the client indicates an understanding of the preventive measures of genital tract infection?	Question ID : 476943157 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	1. I should avoid the use of condoms. 2. I should wear underwear with a cotton panel liner. 3. I can douche anytime I want. 4. I can wear my tight-fitting jeans.	
Q.27	The nurse administers Heparin BD subcutaneously for a patient in cardiogenic shock. The drug is expected to exhibit _____ action.	Question ID : 47694383 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Vasopressor 2. Ionotrope 3. Antidysrhythmic 4. Anticoagulant	

Q.28	The leadership style developed by Kenneth Blanchard and Paul Hersey based on task and relationship behaviour is known as:	Question ID : 476943199 Status : Not Answered Chosen Option :-- Marks : 0.00
Ans	1. effective leadership 2. situational leadership 3. transformational leadership 4. charismatic leadership	
Q.29	Linear burrowing of a mite at finger webs, wrists, elbow, ankles and penis is seen in case of:	Question ID : 47694391 Status : Answered Chosen Option :2 Marks : 1.00
Ans	1. Psoriasis 2. Scabies 3. Impetigo 4. Herpes zoster	
Q.30	The anterior fontanel in children closes between:	Question ID : 476943127 Status : Answered Chosen Option :2 Marks : 1.00
Ans	1. one month of age 2. one and half years of age 3. one and half months of age 4. two weeks of age	
Q.31	Which of the following is NOT a probable sign of pregnancy?	Question ID : 476943158 Status : Answered Chosen Option :4 Marks : 1.00
Ans	1. Vaginal discharge 2. Uterine contraction 3. Chadwick's sign 4. Foetal heart rate detected by a non-electric device	
Q.32	Which of the following is the principal mode of heat exchange in an incubator?	Question ID : 476943136 Status : Answered Chosen Option :2 Marks : -0.25
Ans	1. Evaporation 2. Radiation 3. Convection 4. Conduction	
Q.33	Management of Wernicke's disease and Beriberi involves administration of:	Question ID : 47694322 Status : Answered Chosen Option :3 Marks : 1.00
Ans	1. Vitamin A 2. Vitamin C 3. Thiamine 4. Iodine	
Q.34	The first action in case of a blood transfusion reaction is:	Question ID : 476943112 Status : Answered Chosen Option :3 Marks : 1.00
Ans	1. waiting for the symptoms to subside 2. maintaining the line with normal saline 3. stopping the blood 4. informing a physician	
Q.35	Epidemiological triad includes which of the following factors?	Question ID : 47694394 Status : Answered Chosen Option :2 Marks : 1.00
Ans	1. Standardised rates 2. Agent, host and environment 3. Rates, ratio and proportion 4. Incidence, prevalence and trends of disease	
Q.36	Which of the following vaccines should NOT be kept in a freezer?	Question ID : 47694399 Status : Answered Chosen Option :3 Marks : -0.25
Ans	1. Measles, Mumps, and Rubella (MMR) vaccine 2. Diphtheria, Pertussis and Tetanus (DPT) vaccine 3. Measles 4. Polio	
Q.37	Which of the following is used for passive immunisation?	Question ID : 47694350 Status : Answered Chosen Option :1 Marks : 1.00
Ans	1. Human and animal sera 2. Toxoid 3. Killed vaccine 4. Live attenuated vaccine	

Q.38	In statistics, the spread of dispersion is described with the help of:	Question ID : 476943189 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	☒ 1. Standard deviation ☒ 2. Mode ☒ 3. Median ☒ 4. Mean	
Q.39	Which of the following is NOT a function of the sympathetic nervous system?	Question ID : 4769435 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	☒ 1. Increase heart rate ☒ 2. Increase blood pressure ☒ 3. Rest and digest ☒ 4. Fight or flight	
Q.40	Rechannelling of socially unacceptable drives into more constructive activities is called:	Question ID : 476943146 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	☒ 1. Sublimation ☒ 2. Projection ☒ 3. Hallucination ☒ 4. Displacement	
Q.41	The study of the distribution and determinants of a disease is called:	Question ID : 476943101 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	☒ 1. Genealogy ☒ 2. Pathology ☒ 3. Epidemiology ☒ 4. Entomology	
Q.42	Twitching of facial muscles when the facial nerve is tapped anterior to the earlobe is called:	Question ID : 476943119 Status : Answered Chosen Option : 2 Marks : -0.25
Ans	☒ 1. Homans' Sign ☒ 2. Brudzinski's Sign ☒ 3. Trousseau's Sign ☒ 4. Chvostek's Sign	
Q.43	Incision made into the perineum to enlarge the vaginal outlet and facilitate delivery is called:	Question ID : 476943162 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	☒ 1. periniotomy ☒ 2. vaginotomy ☒ 3. vaginoplasty ☒ 4. episiotomy	
Q.44	The act of deliberately ending a person's life to relieve suffering is called:	Question ID : 47694328 Status : Answered Chosen Option : 4 Marks : -0.25
Ans	☒ 1. Libel ☒ 2. Euthanasia ☒ 3. Tort ☒ 4. Suicide	
Q.45	McBurney's point of tenderness is present in:	Question ID : 47694389 Status : Answered Chosen Option : 1 Marks : -0.25
Ans	☒ 1. Acute cholecystitis ☒ 2. Acute gastritis ☒ 3. Acute appendicitis ☒ 4. Acute tonsillitis	
Q.46	A child with recurrent urinary tract infections is most likely to show:	Question ID : 476943129 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	☒ 1. renal and ureteric calculi ☒ 2. posterior urethral valves ☒ 3. vesicoureteric reflux ☒ 4. neurogenic bladder	
Q.47	A patient undergoing cancer chemotherapy is vomiting frequently. The drug of choice in this case is:	Question ID : 476943113 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	☒ 1. Bromocriptine ☒ 2. Ondansetron ☒ 3. Ergotamine ☒ 4. Cimetidine	

Q.48 Gravida refers to which of the following descriptions? Ans ✔1. Number of times a female has been pregnant ✖2. Number of fulltime a female has delivered ✖3. Number of live children ✖4. Number of preterm pregnancies a female has had	Question ID : 476943159 Status : Answered Chosen Option :1 Marks : 1.00
Q.49 The nurse is teaching a group of patients about the mood-stabilising medication, lithium carbonate. Which of the following medications should she instruct the patients to avoid because of the increased risk of lithium toxicity? Ans ✔1. Diuretics ✖2. Antibiotics ✖3. Hypoglycemic agents ✖4. Antacids	Question ID : 47694354 Status : Answered Chosen Option :1 Marks : 1.00
Q.50 Bleeding precautions like needle stick injury prevention should be followed in all of the following cases EXCEPT when the patient is: Ans ✔1. on cephalosporins ✖2. suffering from liver disease ✖3. suffering from haemophilia ✖4. on anticoagulants	Question ID : 476943111 Status : Answered Chosen Option :3 Marks : -0.25
Q.51 When is folic acid started in antenatal period to prevent congenital disorder in an infant? Ans ✖1. During the first trimester ✖2. During the second trimester ✔3. Before conception ✖4. During the third trimester	Question ID : 476943153 Status : Answered Chosen Option :1 Marks : -0.25
Q.52 Which of the following Hepatitis viruses spreads by fecal-oral route? Ans ✖1. Hepatitis B ✔2. Hepatitis A ✖3. Hepatitis D ✖4. Hepatitis C	Question ID : 47694347 Status : Answered Chosen Option :2 Marks : 1.00
Q.53 Which of the following is a long continuous strand of DNA that carries genetic information? Ans ✔1. Chromosome ✖2. Nucleus ✖3. Mitochondria ✖4. Ribosome	Question ID : 47694374 Status : Answered Chosen Option :1 Marks : 1.00
Q.54 Which of the following is NOT an Indian System of medicine? Ans ✔1. Feng Shui ✖2. Unani ✖3. Homeopathy ✖4. Ayurveda	Question ID : 476943176 Status : Answered Chosen Option :1 Marks : 1.00
Q.55 Tetracycline is used as prophylaxis for _____. Ans ✔1. Cholera ✖2. Brucellosis ✖3. Leptospirosis ✖4. Meningitis	Question ID : 47694357 Status : Answered Chosen Option :1 Marks : 1.00
Q.56 Rohit, aged 15 years, complains of bleeding gums. The nurse will advise him to take a diet high in: Ans ✖1. Vitamin B ✔2. Vitamin C ✖3. Vitamin A ✖4. Vitamin D	Question ID : 47694320 Status : Answered Chosen Option :2 Marks : 1.00
Q.57 Use of punishment and coercion is used in which style of leadership? Ans ✖1. Democratic ✖2. Laissez-faire ✖3. Participative ✔4. Authoritarian	Question ID : 476943200 Status : Not Answered Chosen Option :-- Marks : 0.00

Q.58	Exaggerated convexity in thoracic region is called _____.	Question ID : 47694338 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Lordosis 2. Myelitis 3. Scoliosis 4. Kyphosis	
Q.59	Who is the ‘Father of Psychoanalytical Theory’?	Question ID : 47694339 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	1. Jean Piaget 2. Abraham Maslow 3. Sigmund Freud 4. Lawrence Kohlberg	
Q.60	Vitamin B ₆ (pyridoxine) is given with isoniazid (INH) because it:	Question ID : 47694371 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. accelerates destruction of the remaining organisms after inhibition of their reproduction by isoniazid 2. improves the immunologic response of the client 3. enhances tuberculostatic effect of isoniazid 4. provides the vitamin when isoniazid is interfering with natural vitamin synthesis	
Q.61	A patient is scheduled for a pulmonary function test. The nurse explains that during the test the respiratory therapist will ask the patient to breathe normally to measure the:	Question ID : 47694378 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. Tidal Volume 2. Total Lung Capacity 3. Residual Volume 4. Vital Capacity	
Q.62	Which correlation is the strongest?	Question ID : 476943187 Status : Answered Chosen Option : 4 Marks : -0.25
Ans	1. -1.00 2. +0.90 3. -0.95 4. +0.10	
Q.63	Andragogy refers to:	Question ID : 476943167 Status : Not Answered Chosen Option : -- Marks : 0.00
Ans	1. experiential learning 2. action learning 3. adult learning 4. child learning	
Q.64	While asking about the history of a patient, the nurse finds out that the patient is on a plant-based diet only. She understands that he might develop:	Question ID : 47694321 Status : Answered Chosen Option : 1 Marks : -0.25
Ans	1. Marasmus 2. Scurvy 3. Pellagra 4. Megaloblastic anemia	
Q.65	A nurse is reviewing a patient’s records and notes that the patient has renal disorder. The nurse expects to note which of the following laboratory results?	Question ID : 476943121 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	1. Increased haemoglobin level 2. Decreased serum phosphate level 3. Elevated serum creatinine level 4. Decreased serum potassium level	
Q.66	What would you monitor in a patient taking high doses of acetaminophen over a prolonged period?	Question ID : 47694380 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	1. Prothrombin time 2. GI irritation 3. Liver function 4. Kidney function	

Q.67	A patient with chronic renal failure is receiving Epoetin Alfa. Which laboratory result would indicate a therapeutic effect of the medication?	Question ID : 47694366 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	✓ 1. Haematocrit 32 % ✗ 2. WBC count of 6000 cells/mm³ ✗ 3. Platelet count of 400,000 cells/mm³ ✗ 4. BUN of 15 mg/dl	
Q.68	When examining a patient who is paralysed below the T4 level, the medical-surgical nurse expects to find:	Question ID : 476943122 Status : Answered Chosen Option : 3 Marks : -0.25
Ans	✗ 1. flaccidity of the upper extremities ✗ 2. hyperreflexia and spasticity of the upper extremities ✗ 3. impaired diaphragmatic function requiring ventilator support ✓ 4. independent use of the upper extremities and efficient cough	
Q.69	All of the following are characteristics of FALSE labour EXCEPT:	Question ID : 476943163 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	✗ 1. relief by activity ✗ 2. no progress of contractions ✗ 3. irregular contractions ✓ 4. dilatation and effacement of the cervix	
Q.70	Which of the following is an antidote for acetaminophen poisoning?	Question ID : 47694356 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	✗ 1. Physostigmine ✗ 2. Deferoxamine ✗ 3. Digiband ✓ 4. N-Acetyl cysteine	
Q.71	A patient with renal failure having edema is most likely to receive:	Question ID : 47694362 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	✗ 1. Antidiuretics ✗ 2. Beta blockers ✓ 3. Diuretics ✗ 4. Laxatives	
Q.72	The name of the nursing diagnosis is linked to the etiology with the phrase:	Question ID : 47694324 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	✗ 1. “as manifested by” ✗ 2. “due to” ✓ 3. “related to” ✗ 4. “evidenced by”	
Q.73	Incidence is defined as:	Question ID : 476943175 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	✗ 1. number of old cases present ✓ 2. number of new cases occurring during a specific period ✗ 3. number of cases existing in a given period ✗ 4. number of cases existing in a given population at a given moment	
Q.74	Which type of error is committed in testing a hypothesis when the researcher accepts the null hypothesis that is actually false?	Question ID : 476943190 Status : Answered Chosen Option : 3 Marks : -0.25
Ans	✗ 1. Type III ✓ 2. Type II ✗ 3. Type I ✗ 4. Type IV	
Q.75	Hypertonicity and scissoring leg movements are expected clinical findings in:	Question ID : 476943109 Status : Answered Chosen Option : 4 Marks : -0.25
Ans	✓ 1. Cerebral Palsy ✗ 2. Autism ✗ 3. Mental Retardation ✗ 4. Schizophrenia	

Q.76	A patient who abuses alcohol and cocaine tells a nurse that he only uses substances because of his stressful marriage and difficult job. Which defence mechanism is this patient using?	Question ID : 476943144 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	1. Projection 2. Displacement 3. Rationalisation 4. Sublimation	
Q.77	Coombs test is performed to predict which complication in a foetus?	Question ID : 476943155 Status : Answered Chosen Option : 1 Marks : -0.25
Ans	1. Genetic thalassaemia 2. Physiologic hyperbilirubinaemia 3. Metabolic disorder 4. Acute haemolytic disease	
Q.78	If a test is sensitive, it will be explained as:	Question ID : 476943178 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. the ability of a test to correctly identify those without the disease (true negative rate) 2. true positive in current time 3. true positive in long time 4. the ability of a test to correctly identify those with the disease (true positive rate)	
Q.79	Chloroquine exhibits _____ action.	Question ID : 47694361 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	1. Antiamoebic 2. Antimalarial 3. Antiviral 4. Antifungal	
Q.80	Increased nuchal translucency observed in the 13th week of fetal ultrasound is characteristic of:	Question ID : 47694373 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Klinefelter's syndrome 2. Turner's syndrome 3. Hydrocephalus 4. Down's syndrome	
Q.81	A type of educational assessment which is generally carried out throughout a course or project is termed as a/an _____ assessment.	Question ID : 476943168 Status : Answered Chosen Option : 2 Marks : -0.25
Ans	1. summative 2. informal 3. formative 4. criterion-referenced	
Q.82	A client is suffering from diabetes mellitus. Which of the following symptoms indicate hyperglycemia?	Question ID : 47694364 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	1. Diaphoresis, dizziness, hunger 2. Headache, blurred vision, nausea 3. Polyuria, polydipsia, polyphagia 4. Oliguria, fluid retention, shortness of breath	
Q.83	Dusky hue of the vestibule and anterior vaginal wall visible at about 8th week of pregnancy is called as:	Question ID : 476943165 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	1. Goodell's sign 2. Chadwick's sign 3. Hegar's sign 4. Palmer's sign	
Q.84	Pain in calf on dorsiflexion of the foot (Homans' sign) may indicate:	Question ID : 47694368 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. Thrombophlebitis 2. Aneurysm 3. Lymphedema 4. Cellulitis	
Q.85	Parrot-like repetition of words spoken by another person is known as:	Question ID : 476943150 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	1. Dyscalculia 2. Echolalia 3. Neologism 4. Echopraxia	

Q.86 Ms Rohini is a new Nurse Educator of a private tertiary hospital. She conducts orientation among new staff nurses in her department. Leena, one of the new staff nurses, wants to understand the channel of communication, span of control and lines of communication. Which of the following will provide this information?

- Ans
- ☒ 1. Policy
 - ☒ 2. Job description
 - ☒ 3. Manual of procedures
 - ☒ 4. Organisational structure

Question ID : 476943195
Status : Answered
Chosen Option : 4
Marks : 1.00

Q.87 Painful spasms of the hamstring muscle and resistance to further extension of the leg at the knee while flexing the hip of a recumbent patient is called:

- Ans
- ☒ 1. Brudzinski's Sign
 - ☒ 2. Kernig's Sign
 - ☒ 3. Opisthotonus
 - ☒ 4. Ankle Clonus

Question ID : 476943118
Status : Answered
Chosen Option : 2
Marks : 1.00

Q.88 The art of applying mock injuries for the purpose of training emergency response teams and other medical personnel is called _____.

- Ans
- ☒ 1. specimen
 - ☒ 2. moulage
 - ☒ 3. exhibit
 - ☒ 4. model

Question ID : 476943172
Status : Answered
Chosen Option : 2
Marks : 1.00

Q.89 A _____ is an elevation of skin filled with fluid and is less than 1 cm in diameter.

- Ans
- ☒ 1. Wheal
 - ☒ 2. Vesicle
 - ☒ 3. Macule
 - ☒ 4. Papule

Question ID : 47694392
Status : Answered
Chosen Option : 2
Marks : 1.00

Q.90 In a lecture on sexual functioning, a nurse will include the fact that ovulation occurs when the:

- Ans
- ☒ 1. blood level of LH is too high
 - ☒ 2. progesterone level is high
 - ☒ 3. oxytocin level is too high
 - ☒ 4. endometrial wall is sloughed off

Question ID : 4769439
Status : Answered
Chosen Option : 4
Marks : -0.25

Q.91 To decrease bradyarrhythmias in children during endotracheal intubation, Succinylcholine is given along with:

- Ans
- ☒ 1. Vecuronium
 - ☒ 2. Xylocaine
 - ☒ 3. Adrenaline
 - ☒ 4. Atropine Sulphate

Question ID : 476943125
Status : Answered
Chosen Option : 2
Marks : -0.25

Q.92 The normal range for pH of blood is:

- Ans
- ☒ 1. 7.35-7.45
 - ☒ 2. 8.0-8.2
 - ☒ 3. 7.47-7.57
 - ☒ 4. 7.11-7.22

Question ID : 47694310
Status : Answered
Chosen Option : 1
Marks : 1.00

Q.93 Reed–Sternberg cells in nodes are found in:

- Ans
- ☒ 1. Leukaemia
 - ☒ 2. Non-Hodgkin's Lymphoma
 - ☒ 3. Multiple Myeloma
 - ☒ 4. Hodgkin's Lymphoma

Question ID : 476943110
Status : Answered
Chosen Option : 4
Marks : 1.00

Q.94 Which of the following contains deoxygenated blood?

- Ans
- ☒ 1. Subclavian artery
 - ☒ 2. Aorta
 - ☒ 3. Pulmonary vein
 - ☒ 4. Pulmonary artery

Question ID : 4769433
Status : Answered
Chosen Option : 4
Marks : 1.00

Q.95	The chief distinguishing feature of psychotic disorders is:	Question ID : 47694340 Status : Answered Chosen Option :1 Marks : 1.00
Ans	✓ 1. Confusion between fantasy and reality ✗ 2. Overwhelming anxiety ✗ 3. Obsessive behavior ✗ 4. Antisocial conduct	
Q.96	How many moments of hand hygiene have been laid down by WHO?	Question ID : 47694346 Status : Answered Chosen Option :1 Marks : -0.25
Ans	✗ 1. 6 ✗ 2. 8 ✗ 3. 7 ✓ 4. 5	
Q.97	Untwisting of the neck sustained during internal rotation is called as:	Question ID : 476943164 Status : Answered Chosen Option :2 Marks : 1.00
Ans	✗ 1. flexion ✓ 2. restitution ✗ 3. torsion ✗ 4. crowning	
Q.98	Which of the following is a stage of the nursing process in which the nurse continuously collects data to identify a patient's actual and potential health needs?	Question ID : 47694334 Status : Answered Chosen Option :4 Marks : 1.00
Ans	✗ 1. Implementation ✗ 2. Planning ✗ 3. Evaluation ✓ 4. Assessment	
Q.99	What are the basic structural units of proteins?	Question ID : 47694317 Status : Answered Chosen Option :2 Marks : 1.00
Ans	✗ 1. Sucrose ✓ 2. Amino acids ✗ 3. Fatty acids ✗ 4. Peptides	
Q.100	A nurse is doing endotracheal suctioning. During the procedure, the nurse notes decreasing heart rate on the monitor. What should be the first priority action?	Question ID : 476943117 Status : Answered Chosen Option :3 Marks : 1.00
Ans	✗ 1. Notify the physician immediately. ✗ 2. Continue to suction. ✓ 3. Stop the procedure and reoxygenate the patient. ✗ 4. Ensure that suction is limited to 15 seconds.	
Q.101	The maintenance provided by a husband to his divorced wife is called:	Question ID : 476943105 Status : Answered Chosen Option :1 Marks : -0.25
Ans	✗ 1. Mehr ✓ 2. Alimony ✗ 3. Bride Price ✗ 4. Dowry	
Q.102	A rare condition in which separate personalities exist in the same person is called:	Question ID : 47694341 Status : Answered Chosen Option :4 Marks : 1.00
Ans	✗ 1. Somatoform disorder ✗ 2. Delusion ✗ 3. Schizophrenia ✓ 4. Dissociative identity disorder	
Q.103	The pacemaker of the heart is:	Question ID : 47694314 Status : Answered Chosen Option :2 Marks : 1.00
Ans	✗ 1. AV node ✓ 2. SA node ✗ 3. Purkinje fibres ✗ 4. Right atrium	
Q.104	A nurse enters the room of a patient with a cognitive impairment disorder and asks what day of the week it is; what the date, month and year are; and where the patient is. The nurse is attempting to assess:	Question ID : 476943142 Status : Answered Chosen Option :3 Marks : 1.00
Ans	✗ 1. Delirium ✗ 2. Confabulation ✓ 3. Orientation ✗ 4. Perseveration	

Q.105	Which of the following pathophysiological processes is involved in multiple sclerosis?	Question ID : 47694363 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	1. Destruction of the brainstem and basal ganglia in the brain 2. Chronic inflammation of rhizomes just outside the central nervous system 3. Development of demyelination of the myelin sheath, interfering with the nerve transmission 4. Degeneration of the nucleus pulposus, causing pressure on the spinal cord	
Q.106	Compression to ventilation ratio in adults with two rescuers is:	Question ID : 47694385 Status : Answered Chosen Option : 1 Marks : -0.25
Ans	1. 30 : 2 2. 15 : 2 3. 2 : 30 4. 15 : 1	
Q.107	The Hawthorne study to determine the relationship between the intensity of illuminations and workers' productivity was done by:	Question ID : 476943193 Status : Not Answered Chosen Option : -- Marks : 0.00
Ans	1. Mary Parker Follett 2. Kurt Levin 3. Abraham Maslow 4. Elton Mayo	
Q.108	A nurse teaches a pregnant client to perform Kegel exercises. Which statement by the client indicates an understanding of the purpose of these types of exercises?	Question ID : 476943156 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. The exercises will help strengthen the pelvic floor in preparation for delivery. 2. The exercises will help prevent urinary tenderness. 3. The exercises will help prevent oedema. 4. The exercises will help reduce uterine contraction.	
Q.109	An 18-month-old infant hospitalised with a severe asthma attack is given prednisone, 15 mg po bid. The nurse should:	Question ID : 476943126 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. check the child's eosinophil count daily 2. have the child rest as much as possible 3. keep the child NPO except for medications 4. prevent exposing the child to infection	
Q.110	All of the following are vector borne diseases EXCEPT:	Question ID : 47694345 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Malaria 2. Chagas disease 3. Filariasis 4. Rubella	
Q.111	Which nursing intervention is appropriate to prevent pulmonary embolus in a patient who is prescribed bed rest?	Question ID : 47694370 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. Teach the patient to move legs in bed 2. Encourage deep breathing and coughing 3. Use the knee gatch when the client is in bed 4. Limit the patient's fluid intake	
Q.112	Isolation of a child with mumps belongs to what level of prevention?	Question ID : 476943179 Status : Answered Chosen Option : 1 Marks : -0.25
Ans	1. Secondary 2. Intermediate 3. Primary 4. Tertiary	
Q.113	How should a nurse assess whether a patient with cirrhosis has asterixis?	Question ID : 476943114 Status : Answered Chosen Option : 2 Marks : -0.25
Ans	1. Ask the patient to extend the arms. 2. Measure the abdominal girth. 3. Instruct the patient to lean forward. 4. Dorsiflex the patient's foot.	

Q.114	The movement of the head and shoulders is controlled by the:	Question ID : 4769431 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	✖ 1. Glossopharyngeal nerve ✖ 2. Hypoglossal nerve ✖ 3. Abducens nerve ✔ 4. Accessory nerve	
Q.115	A nurse should understand that electroconvulsive therapy is primarily used in psychiatric care for the treatment of:	Question ID : 476943141 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	✖ 1. Anxiety ✖ 2. Mania ✖ 3. Schizophrenia ✔ 4. Depression	
Q.116	Which of the following is NOT a major feature of capitalism?	Question ID : 476943104 Status : Not Answered Chosen Option : -- Marks : 0.00
Ans	✖ 1. Competition ✔ 2. Equitable distribution of income ✖ 3. Profit incentive ✖ 4. Private property	
Q.117	Which of the following immunoglobulin will be high in a person with an allergy?	Question ID : 47694312 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	✖ 1. Ig M ✖ 2. Ig A ✖ 3. Ig G ✔ 4. Ig E	
Q.118	Validity of a data-collection instrument means:	Question ID : 476943184 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	✖ 1. the consistency of data over time ✖ 2. the stability of data over time ✖ 3. the degree to which two different forms of an instrument obtain the same results ✔ 4. the ability of the instrument to gather the data that it is intended to measure	
Q.119	A child is admitted to the paediatric ward with suspected rheumatic arthritis. What should be an important question that a nurse should ask the parents?	Question ID : 476943128 Status : Answered Chosen Option : 4 Marks : -0.25
Ans	✖ 1. Did the child vomit for 4 days? ✖ 2. Did the child show a lack of interest in food? ✔ 3. Did a recent episode of pharyngitis develop? ✖ 4. Did the fever start 3 days ago?	
Q.120	Which of the following is one of the most popular and useful ways of showing activities displayed against time where on the left side is a list of the activities represented by a bar and along the top is a time scale reflecting the start date, duration and end date of the activity?	Question ID : 476943194 Status : Not Answered Chosen Option : -- Marks : 0.00
Ans	✔ 1. Gantt chart ✖ 2. PERT analysis ✖ 3. Nomogram ✖ 4. Rotation plan	
Q.121	A parent who copes with quarreling among young children by placing them in separate rooms is using:	Question ID : 47694342 Status : Answered Chosen Option : 2 Marks : -0.25
Ans	✔ 1. Time out ✖ 2. Punishment ✖ 3. Reinforcement ✖ 4. Shaping	
Q.122	Deficiency of which of the following neurotransmitters in the brain will cause Alzheimer's disease?	Question ID : 4769437 Status : Answered Chosen Option : 3 Marks : -0.25
Ans	✖ 1. Serotonin ✔ 2. Acetylcholine ✖ 3. GABA (gamma-aminobutyric acid) ✖ 4. Dopamine	

Q.123 Cystic fibrosis is an example of: Ans 1. Autosomal dominant disorder 2. X linked dominant disorder 3. Autosomal recessive disorder 4. X linked recessive disorder	Question ID : 47694375 Status : Answered Chosen Option : 1 Marks : -0.25
Q.124 Stunting refers to: Ans 1. low weight than what is appropriate for a certain height 2. low height than what is appropriate for a certain age 3. low weight than what is appropriate for a certain age 4. low BMI	Question ID : 476943130 Status : Not Answered Chosen Option : -- Marks : 0.00
Q.125 Which organ is the primary site of haematopoiesis in the foetus before mid-pregnancy? Ans 1. Liver 2. Spleen 3. Lung 4. Bone	Question ID : 476943135 Status : Answered Chosen Option : 2 Marks : -0.25
Q.126 The _____ is the largest bone in the human body. Ans 1. Sternum 2. Femur 3. Tibia 4. Stapes	Question ID : 4769434 Status : Answered Chosen Option : 2 Marks : 1.00
Q.127 When administering an IM injection to an infant, the nurse in charge should use which site? Ans 1. Vastus lateralis 2. Deltoid 3. Ventrogluteal 4. Dorsogluteal	Question ID : 476943123 Status : Answered Chosen Option : 1 Marks : 1.00
Q.128 Colles' fracture is a fracture of the: Ans 1. distal end of radius 2. proximal end of radius 3. distal end of ulna 4. shaft of Humerus	Question ID : 47694388 Status : Answered Chosen Option : 1 Marks : 1.00
Q.129 The amount of blood ejected by each ventricular contraction is called the: Ans 1. Cardiac output 2. Expiratory reserve 3. Stroke volume 4. Tidal volume	Question ID : 47694315 Status : Answered Chosen Option : 3 Marks : 1.00
Q.130 A sampling method which involves a random start and then proceeds with the selection of every kth element from then onwards is called _____. (where k = population size/sample size) Ans 1. simple random sampling 2. stratified random sampling 3. systematic sampling 4. snowball sampling	Question ID : 476943186 Status : Answered Chosen Option : 1 Marks : -0.25
Q.131 An Intrathecal injection administers a drug through the: Ans 1. cardiac area 2. superficial vein 3. spine 4. knee	Question ID : 47694336 Status : Answered Chosen Option : 3 Marks : 1.00
Q.132 Brushfields spots, protruded tongue and single palmar crease are characteristic features of: Ans 1. Turner syndrome 2. Edwards syndrome 3. Patau syndrome 4. Down syndrome	Question ID : 47694376 Status : Answered Chosen Option : 4 Marks : 1.00

Q.133 “Man is a social animal” — Who said so? Ans 1. Aristotle 2. Plato 3. Comte 4. Karl Marx	Question ID : 476943106 Status : Answered Chosen Option :1 Marks : 1.00
Q.134 Which of the following statements about acid base balance is INCORRECT? Ans 1. Overuse of antacids causes metabolic acidosis 2. Hyperventilation causes respiratory alkalosis 3. Hypoventilation causes respiratory acidosis 4. Loss of gastric juices causes metabolic alkalosis	Question ID : 47694365 Status : Answered Chosen Option :1 Marks : 1.00
Q.135 Unshakeable and persistent ideas are called: Ans 1. Delusions 2. Hallucinations 3. Illusions 4. Compulsions	Question ID : 476943148 Status : Answered Chosen Option :1 Marks : 1.00
Q.136 The four terms that are required to construct a PERT network are events, activities, _____ and _____. Ans 1. slack time; critical path 2. crucial path; earliest date 3. crucial path; slack time 4. critical path; estimated time	Question ID : 476943197 Status : Not Answered Chosen Option :-- Marks : 0.00
Q.137 A 1-month-old boy presents with failure to thrive. On examination, he shows features of congestive heart failure. The femoral pulses are feeble as compared to the brachial pulses. The most likely clinical diagnosis is: Ans 1. congenital aortic stenosis 2. congenital aortoiliac disease 3. coarctation of aorta 4. patent ductus arteriosus	Question ID : 476943134 Status : Answered Chosen Option :1 Marks : -0.25
Q.138 The main difference between a prokaryotic cell and an eukaryotic cell is the absence of: Ans 1. Mitochondria 2. Flagella 3. True nucleus 4. Plasma membrane	Question ID : 47694352 Status : Answered Chosen Option :3 Marks : 1.00
Q.139 When planning care to a postpartum client with thromboembolic disease to prevent the complication of pulmonary embolism, what should be the intervention? Ans 1. Assess the breath sounds frequently 2. Enforce bed-rest 3. Monitor the vital signs frequently 4. Administer and monitor anticoagulant therapy	Question ID : 476943154 Status : Answered Chosen Option :4 Marks : 1.00
Q.140 All of the following are side effects of Rifampicin EXCEPT: Ans 1. Orange-colored urine 2. Hypertension 3. Anorexia 4. Dizziness	Question ID : 47694359 Status : Answered Chosen Option :2 Marks : 1.00
Q.141 Sharing responsibility and authority with others and holding them accountable for performance is termed as _____. Ans 1. delegation 2. organising 3. controlling 4. leading	Question ID : 476943198 Status : Answered Chosen Option :3 Marks : -0.25
Q.142 Which of the following communication techniques should be avoided by nurses? Ans 1. Listening 2. Belittling 3. Reflecting 4. Validating	Question ID : 476943147 Status : Answered Chosen Option :3 Marks : -0.25

Q.143	Cecum, colon and rectum are a part of:	Question ID : 4769438 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Pleural cavity 2. Small intestine 3. Peritoneum 4. Large intestine	
Q.144	Which of the following combinations of adverse effects must be carefully monitored when administering I.V. insulin to a patient diagnosed with diabetic ketoacidosis?	Question ID : 47694372 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. Hypokalemia and hypoglycemia 2. Hypocalcemia and hyponatremia 3. Hypercalcemia and hypernatremia 4. Hyperkalemia and hyperglycemia	
Q.145	Which of the following is a diagnostic test for typhoid?	Question ID : 47694343 Status : Answered Chosen Option : 2 Marks : 1.00
Ans	1. Shick test 2. Widal test 3. ELISA 4. Mantoux test	
Q.146	Relationship between two variables like age and weight can be presented using a _____.	Question ID : 476943188 Status : Answered Chosen Option : 1 Marks : -0.25
Ans	1. bar diagram 2. histogram 3. scatter diagram 4. pie diagram	
Q.147	Which of the following vaccinations is NOT a part of the Expanded Programme of Immunisation?	Question ID : 47694396 Status : Answered Chosen Option : 3 Marks : -0.25
Ans	1. Diphtheria, Pertussis and Tetanus (DPT) vaccine 2. Measles, Mumps, and Rubella (MMR) vaccine 3. Oral poliovirus vaccines (OPV) 4. Measles vaccine	
Q.148	The four metaparadigms of nursing theory are:	Question ID : 47694325 Status : Not Answered Chosen Option : -- Marks : 0.00
Ans	1. Nursing, Health, Communication and Person 2. Person, Health, Environment and Nursing 3. Person, Health, Communication and Nursing 4. Person, Wellness, Security and Nursing	
Q.149	A nurse receives an order to give a patient two puffs of salmeterol, and two puffs of beclomethasone dipropionate, by a metered dose inhaler. The nurse should administer the medication by:	Question ID : 476943116 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. giving the salmeterol first and then the beclomethasone 2. alternating a single puff of each, beginning with the beclomethasone 3. giving the beclomethasone first and then the salmeterol 4. alternating a single puff of each, beginning with the salmeterol	
Q.150	Which of the following organs is affected in gastro-oesophageal reflux disease (GERD)?	Question ID : 476943133 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. Lower oesophageal sphincter 2. Pylorus 3. Duodenum 4. Diaphragm	
Q.151	Which of the following is NOT a modifiable risk factor in the case of diabetes?	Question ID : 47694397 Status : Answered Chosen Option : 3 Marks : -0.25
Ans	1. Age 2. Alcohol intake 3. Salt intake 4. Obesity	

Q.152	Which blood group can be administered to a patient in emergency when his blood group is not known?	Question ID : 47694313 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. O negative 2. AB positive 3. AB negative 4. O positive	
Q.153	A nurse is describing the process of foetal circulation to a client during a prenatal visit. The nurse accurately tells the client that foetal circulation consists of:	Question ID : 476943152 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. two umbilical arteries and one umbilical vein 2. arteries carrying oxygenated blood to the foetus 3. two umbilical veins and one umbilical artery 4. veins carrying deoxygenated blood to the foetus	
Q.154	Non-stress test is said to be normal if there are:	Question ID : 476943161 Status : Answered Chosen Option : 4 Marks : -0.25
Ans	1. No accelerations during a 40 min observation 2. 2 or more FHR accelerations during a 20 min period 3. 2 or more FHR accelerations in a 40 min period 4. no decelerations during a 40 min observation	
Q.155	Tall-tented T waves and widened QRS are seen in:	Question ID : 47694386 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Hyperphosphatemia 2. Hyperglycemia 3. Hyponatremia 4. Hyperkalemia	
Q.156	Billroth I and Billroth II are surgical procedures done for:	Question ID : 476943115 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Lung cancer 2. Pancreatic cancer 3. Breast cancer 4. Gastric cancer	
Q.157	A patient says to a nurse, "Everyone would be better off if I wasn't alive." Which nursing diagnosis would be made based on this statement?	Question ID : 476943143 Status : Answered Chosen Option : 2 Marks : -0.25
Ans	1. Ineffective coping 2. Impaired social interaction 3. Risk for self-directed violence 4. Disturbed thought processes	
Q.158	A patient is suspected of having a myocardial infarction. The nurse assesses for elevations in which of the following isoenzyme values reported with the creatine kinase level?	Question ID : 47694377 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	1. BB 2. MK 3. MB 4. MM	
Q.159	The _____ is the major muscle responsible for breathing in humans.	Question ID : 4769436 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	1. Rectus abdominis 2. Sternocleidomastoid 3. Trapezius 4. Diaphragm	
Q.160	The _____ hormone is secreted by the posterior pituitary.	Question ID : 4769432 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	1. Oxytocin 2. Prolactin 3. Melanocyte secreting 4. Luteinizing	

Q.161 A pregnant client tells a nurse that she found some clear fluid during urination. The nurse immediately assesses the perineum and finds the umbilical cord coming out. The priority nursing action is: Ans 1. place the client in the Trendelenburg position 2. start oxygen therapy 3. recording and reporting in nursing notes 4. shift to the emergency room	Question ID : 476943160 Status : Answered Chosen Option : 2 Marks : -0.25
Q.162 The borehole latrine was introduced in India by: Ans 1. Rotary Foundation 2. UNICEF 3. Melinda Gates Foundation 4. Rockefeller Foundation	Question ID : 476943180 Status : Answered Chosen Option : 4 Marks : 1.00
Q.163 Ophthalmic medications should be instilled at: Ans 1. upper conjunctival sac 2. the edge of the eye 3. the cornea of the eye 4. lower conjunctival sac	Question ID : 47694331 Status : Answered Chosen Option : 4 Marks : 1.00
Q.164 A nurse is conducting a dietary assessment of a patient who is on a vegan diet. The nurse should plan to provide dietary teaching focused on food items high in which vitamin that may be absent in a vegan diet? Ans 1. Vitamin C 2. Vitamin B₁₂ 3. Vitamin E 4. Vitamin A	Question ID : 47694381 Status : Answered Chosen Option : 2 Marks : 1.00
Q.165 Hemorrhagic disease of the newborn is caused by the deficiency of which vitamin? Ans 1. Vitamin A 2. Vitamin D 3. Vitamin C 4. Vitamin K	Question ID : 47694318 Status : Answered Chosen Option : 4 Marks : 1.00
Q.166 The statements of beliefs and ideas, which are considered to be true, are known as: Ans 1. assumptions 2. operational definitions 3. hypotheses 4. conceptual definitions	Question ID : 476943183 Status : Answered Chosen Option : 1 Marks : 1.00
Q.167 The process in which a nasogastric tube is inserted, the stomach is flushed and ingested substances are removed through the tube is called: Ans 1. Gastric lavage 2. Gastric gavage 3. Decompensation 4. Colonic irrigation	Question ID : 47694332 Status : Answered Chosen Option : 1 Marks : 1.00
Q.168 If a chest drainage system line is broken or interrupted, the nurse's first course of action should be to: Ans 1. document findings 2. clamp the tube immediately 3. notify the physician 4. check the patient's vitals	Question ID : 47694335 Status : Answered Chosen Option : 2 Marks : 1.00
Q.169 Acid-fast bacilli are found positive in which of the following conditions? Ans 1. Diphtheria 2. SARS and Diphtheria 3. Tuberculosis 4. Tuberculosis and Leprosy	Question ID : 476943100 Status : Answered Chosen Option : 3 Marks : -0.25

Q.170 Cracked pot sound elicited while skull percussion indicative of increased intracranial tension is known as: Ans 1. Homans' sign 2. Peroneal sign 3. Romberg sign 4. Macewen's sign	Question ID : 476943107 Status : Not Answered Chosen Option :-- Marks : 0.00
Q.171 A patient with Diabetes mellitus has a glycosylated haemoglobin A_{1c} level of 9%. Based on this test result, the nurse plans to teach the client about the need to: Ans 1. avoid infection 2. prevent and recognise hyperglycaemia 3. take in adequate fluids 4. prevent and recognise hypoglycaemia	Question ID : 47694384 Status : Answered Chosen Option :2 Marks : 1.00
Q.172 Supervision and delegation is a part of which phase of management process? Ans 1. Directing 2. Organising 3. Controlling 4. Planning	Question ID : 476943192 Status : Answered Chosen Option :1 Marks : 1.00
Q.173 Infection that occurs as a result of a therapeutic or diagnostic procedure is called a/an: Ans 1. Nosocomial infection 2. Opportunistic infection 3. Iatrogenic infection 4. Cross infection	Question ID : 47694351 Status : Answered Chosen Option :1 Marks : -0.25
Q.174 All of the following are vitamin deficiencies in children EXCEPT: Ans 1. Rickets 2. Simple Goitre 3. Megaloblastic Anaemia 4. Bitot's Spots	Question ID : 476943131 Status : Answered Chosen Option :2 Marks : 1.00
Q.175 Which of the following drugs is the antidote for magnesium toxicity? Ans 1. Calcium gluconate 2. Hydralazine 3. Vitamin K 4. Naloxone	Question ID : 47694358 Status : Answered Chosen Option :1 Marks : 1.00
Q.176 Ms Swati wants to influence the customary way of thinking and behaving that is shared by the members of the department. What is this termed as? Ans 1. Organisational culture 2. Organisational chart 3. Organisational structure 4. Cultural network	Question ID : 476943196 Status : Not Answered Chosen Option :-- Marks : 0.00
Q.177 Perinatal death includes death during: Ans 1. 28th week of gestation to 7 days after birth 2. 37th week of gestation to 14 days after birth 3. zero to 28 days of age 4. zero to one month of age	Question ID : 476943182 Status : Answered Chosen Option :1 Marks : 1.00
Q.178 The management theorist _____ developed the '14 Principles of Management'. Ans 1. Henri Fayol 2. Max Weber 3. Fredrick Taylor 4. Mary Follet	Question ID : 476943191 Status : Not Answered Chosen Option :-- Marks : 0.00

Q.179	Which of the following is considered as an indication for administering serum albumin?	Question ID : 47694369 Status : Answered Chosen Option : 1 Marks : 1.00
Ans	☒ 1. Maintenance of oncotic pressure ☐ 2. Clotting of blood ☐ 3. Formation of WBCs ☐ 4. Formation of RBCs	
Q.180	An 11-year-old child with juvenile rheumatoid arthritis is to be on continued aspirin medication at home. Before discharge from the hospital, the nurse should teach the child and parents to closely monitor for the toxic effects of this drug, which include:	Question ID : 476943124 Status : Answered Chosen Option : 4 Marks : 1.00
Ans	☐ 1. Diarrhoea ☐ 2. Jaundice ☐ 3. Hypothermia ☒ 4. Tinnitus	
Q.181	The process by which molecules of a solvent tend to pass through a semipermeable membrane from a less concentrated solution into a more concentrated one is called:	Question ID : 47694316 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	☐ 1. Active transport ☐ 2. Diffusion ☒ 3. Osmosis ☐ 4. Ultrafiltration	
Q.182	All of the following methods are used for the diagnosis of HIV infection in a two-month-old child EXCEPT:	Question ID : 47694387 Status : Answered Chosen Option : 2 Marks : -0.25
Ans	☐ 1. DNA-PCR ☐ 2. Viral culture ☐ 3. p24 antigen assay ☒ 4. HIV ELISA	
Q.183	All of the following are development assessment techniques EXCEPT:	Question ID : 476943137 Status : Not Answered Chosen Option : -- Marks : 0.00
Ans	☒ 1. MSE ☐ 2. TDSC ☐ 3. DDST ☐ 4. DASII	
Q.184	Which of the following tubes is used to manage upper gastrointestinal haemorrhage due to oesophageal varices?	Question ID : 476943120 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	☐ 1. Jackson-Pratt drain ☐ 2. Penrose drain ☒ 3. Sengstaken-Blakemore tube ☐ 4. T tube	
Q.185	Which of the following is the drug of choice for chemoprophylaxis against rheumatic fever?	Question ID : 47694360 Status : Answered Chosen Option : 3 Marks : 1.00
Ans	☐ 1. Procaine penicillin ☐ 2. Penicillin V ☒ 3. Benzathine penicillin ☐ 4. Erythromycin	
Q.186	Evisceration refers to:	Question ID : 47694330 Status : Answered Chosen Option : 3 Marks : 1.00
