Many of us have enjoyed visiting a zoo and consider it a day out having fun. Seeing real animals face to face can be thrilling and exciting, but

many people wonder whether the animals themselves while entertaining us, are suffering in the zoos. Many zoos do not have enough money to provide the animals with the basic features of a proper environment. Most animals are put in an artificial environment (e.g., cages). This isolation from their natural habitat can amount to cruelty. In some zoos, we see concrete floors for burrowing animals like rabbits. Cruelty may be shown in ways other than physical abuse or starvation.

Big predators like lions and tigers are created to chase and hunt. By depriving them of these activities, we forget the reason for which they have evolved. These big cats lie in cages in the zoo eating the food given to them and they have nothing else to do. Highly intelligent and curious animals like chimpanzees and polar bears may become frustrated in a zoo; they need a challenging environment.

Zoo supporters might argue that zoos provide educational opportunities to the visitors, especially children; if we didn't have animals in zoos, children wouldn't see them at all and be ignorant about them. We live at a time when animals in their natural habitat can be seen on TV or computers, even smartphones while sitting at home. Therefore, the aim should be to conserve animals in the wild, in protected areas called sanctuaries.

India has always been an utmost inspiration for the world at large for her fabulous wealth, both material and economic prosperity as well as her spiritual excellence. It brought here both traders and invaders along with preachers and seekers in search of truth and salvation. Answers

1. Answer: b

Explanation:

The correct answer is 'cheerful persons', i.e. the error lies in this part of the sentence.

★ Key Points

- The error lies in the incorrect usage of noun.
- '**Persons**' needs to be replaced with '**person**'.
- The article used in the sentence i.e. '**a**' is used before a singular noun which gives a general idea.
- Thus, the usage of the plural noun '**persons**' is incorrect here.

Therefore the correct sentence is: '*It is a pleasure to meet a **cheerful person**.*'

★ Additional Information

- **Article:** Articles are words that define a noun as specific or unspecific.
- The definite article is the word the. It limits the meaning of a noun to one particular thing.
 - **Example:** Please give me the red hammer, the blue one is too small.
- The indefinite article indicates that a noun refers to a general idea rather than a particular thing. The indefinite article takes two forms. It's the word a when it precedes a word that begins with a consonant. It's the word an when it precedes a word that begins with a vowel.
 - **Example:**
 - Please hand me a book; any book will do.
 - Please hand me an autobiography; any autobiography will do.

5. Answer: d

Explanation:

The correct answer is option 4 i.e. pessimistic.

Explanation:

- *Optimistic* refers to being hopeful and confident about the future.
- It is synonymous to being 'positive or hopeful.'

Important point:

Let us take a look at what the options mean:

1. **Option:** a thing that is or may be chosen.
 2. Ophthalmology : the branch of medicine concerned with the study and treatment of disorders of the eye.
 3. Positive: constructive, optimistic, or confident.
 4. Pessimistic: tending to see the worst aspect of things or believe that the worst will happen.
- Based on these meanings, *optimistic* refers to being positive or hopeful about things whereas *pessimistic* refers to believing the negative side of things and being less hopeful about the good.

Therefore, option 4 is the antonym of optimistic.

6. Answer: c

Explanation:

The correct answer is option 3) i.e., 'Accept something up to a particular point'

★ Key Points

- Draw the line at something is an idiom that means **to set a limit on what one is willing to do or accept**.
 - Example – **I draw the line** at a pizza with anchovies on it

7. Answer: a

Explanation:

The correct answer is Option 1, i.e., 'A promise was made by me to my husband that food will be cooked by me'.

The given sentence is in the Active voice, as the form of the verbs ('promised' and 'will cook') show that its subject ('I') is doing something and is 'active'.

Therefore, it has to be changed to the Passive voice, where something is done by the subject and it is 'passive'.

In order to do that:

- the verb should be changed from the Active voice to the Passive voice without changing its tense('promised' to 'was promised' and 'will cook' to 'will be cooked')
- The object of the transitive verb in the Active voice should become the subject of the verb in the Passive voice.

The same sentence in the Passive voice should be 'My husband was promised by me that food will be cooked for him by me'. However, none of the given options are framed this way.

It is Option 1 that comes the closest to expressing the given sentence in the Passive voice. 'I promised my husband...' is the same as 'I made a promise to my husband...', and the latter in the Passive is 'A promise was made by me to my husband...'.
Your Personal Exams Guide

Therefore , **the correct answer is Option 1** as it comes the closest to expressing the given sentence in the Passive voice.

Option 2 is incorrect because it does not change the first half of the sentence to Passive voice.

Option 3 is incorrect because it does not change the first half of the sentence to Passive voice.

Option 4 is incorrect because it changes the very form of the original sentence by adding the verb 'wanted' and does not change the second half of the sentence to Passive voice.

21. Answer: a

Explanation:

Given:

$$20\% \text{ of } X = 30\% \text{ of } Y$$

Calculation:

$$(20/100) \times X = (30/100) \times Y$$

$$\Rightarrow (1/5) \times X = (3/10) \times Y$$

$$\Rightarrow X/Y = (5 \times 3)/10$$

$$\Rightarrow X/Y = 15/10$$

$$\Rightarrow X/Y = 3/2$$

$$\Rightarrow X : Y = 3 : 2$$

$\therefore$ The ratio between X and Y is 3 : 2.

22. Answer: c

Explanation:

Given:

Two successive discounts = 20%, 30%

Formula used:

$$\text{Single discount} = x + y + \frac{xy}{100}$$

(where x and y are successive discounts)

Calculations:

$$\text{Single discount} = -20 - 30 + \frac{(-20)(-30)}{100}$$

$$\Rightarrow -50 + 6$$

$$\Rightarrow -44\%$$

Here, a negative sign shows the discount.

$\therefore$ The correct answer is 44%

23. Answer: d

Explanation:

Concept:

LCM of fractions = (LCM of Numerators)/(HCF of Denominators)

Calculation:

LCM of Numerators = LCM (3, 2, 4) = 12

HCF of Denominators = HCF (8, 6, 7) = 1

LCM of $(\frac{3}{8}, \frac{2}{6}, \frac{4}{7})$

$\Rightarrow 12/1 = 12$

Hence, option 4 is the correct answer.

24. Answer: b

Explanation:

Concept:

If N is divided b/w A, B & C in the ratio $a : b : c$ then

Share of A = $[a/(a+b+c)] \times N$

Share of B = $[b/(a+b+c)] \times N$

Share of C = $[c/(a+b+c)] \times N$

Calculation:

Given ratio is $\frac{1}{2} : \frac{1}{4} : \frac{5}{16}$

LCM of (2, 4, 16) = 16

Multiply the given ratio with 16

$$\Rightarrow \left(\frac{1}{2} \times 16\right) : \left(\frac{1}{4} \times 16\right) : \left(\frac{5}{16} \times 16\right)$$

$$\Rightarrow 8 : 4 : 5 :: A : B : C$$

$$\text{Greatest part} = 8 / (8 + 4 + 5) = 8/17$$

$$\text{Smallest part} = 4 / (8 + 4 + 5) = 4/17$$

Therefore, the required difference

$$\Rightarrow \left(\frac{8}{17} - \frac{4}{17}\right) \times 68000$$

$$\Rightarrow (4/17) \times 68000 = 16000$$

$\therefore$ The difference between the greatest part and the smallest part is Rs. 16000.

25. Answer: d

Explanation:

Given: Your Personal Exams Guide

The non terminating recurring number = 0.23535..

Calculation:

Let the number be x.

$$x = 0.23535$$

$$10x = 2.353(i)$$

$$1000x = 235.353....(ii)$$

Subtracting (i) from (ii),

$$990x = 235.353 - 2.353$$

$$990x = 233$$

$$x = 233/990$$

∴ Option 4 is correct.

26. Answer: c

Explanation:

Given:

Cost price = 2000 Rs

Selling Price = 2100 Rs

Formula used:

$$\text{Profit \%} = [(SP - CP)/CP] \times 100$$

Calculation:

Using the above formula

$$\text{Profit \%} = [(2100 - 2000)/2000] \times 100$$

$$\Rightarrow \text{Profit \%} = (100/2000) \times 100 = 5$$

∴ Kapil sold the cycle at 5 % of the profit.

27. Answer: a

Explanation:

Calculation:

We have $\frac{1}{2} : \frac{2}{3} : \frac{3}{4}$

LCM of (2, 3, 4) is 12

Multiply the given fraction with 12

$$\Rightarrow 12 \times \frac{1}{2} : 12 \times \frac{2}{3} : 12 \times \frac{3}{4}$$

$$\Rightarrow 6 : 8 : 9$$

Since, sum = 391

$$\Rightarrow (6 + 8 + 9) \text{ unit} = 391$$

$$\Rightarrow 23 \text{ unit} = 391$$

$$\Rightarrow 1 \text{ unit} = 17$$

Hence, A, B & C will be

$$\Rightarrow 17 \times 6, 17 \times 8, 17 \times 9$$

$$\therefore 102, 136, 153$$

28. Answer: b

Explanation:

Calculation:

$$\text{Total work} = \text{LCM of } (60, 20) = 60$$

$$\text{Efficiency of A} = 60/60 = 1$$

$$\text{Efficiency of Y} = 60/20 = 3$$

$$\text{Efficiency of (A + B)} = 1 + 3 = 4$$

$$\text{So, time taken by them} = 60/4 \text{ days}$$

⇒ 15 days

∴ A and B complete a work in 15 days when working together.

O	of	का
D	Division (÷)	विभाजन (÷)
M	Multiplication (×)	गुणा (×)
A	Addition (+)	जोड़ (+)
S	Subtraction (−)	घटाव (−)

Decoding the information,

Sign	P	Q	R	S
Means	+	×	÷	−

Given:

18 R 9 P 2 Q 8 S 4

After replacing the signs from left to right and using the BODMAS rule,

$$\Rightarrow \underline{18 \div 9} + 2 \times 8 - 4$$

$$\Rightarrow 2 + \underline{2 \times 8} - 4$$

$$\Rightarrow \underline{2 + 16} - 4$$

$$\Rightarrow \underline{18 - 4}$$

$$\Rightarrow 14$$

Hence, the correct answer is "14".
