The statement given below is followed by assumptions numbered as 1 and 2. Look at the statements and decide which of the assumptions is/are implicit.

Give your answer as per below options:

- A) If only assumption 1 is implicit.
- B) If only assumption 2 is implicit.
- C) If neither 1 nor 2 is implicit.
- D) If both 1 and 2 are implicit.

Statement: A 22 per cent increase in school drop out rates has been reported in drought-affected states.

Assumptions:

1. Clean water and sanitation facilities in schools keep children away from schools.
2. School attendance in India increases when children are not required to spend hours collecting water.

- (A) ☒ C (Correct Answer) (Chosen option)
- (B) ☐ D
- (C) ☐ B
- (D) ☐ A

Question No.14

Marks: 1.00

Bookmark ☐

In this question, a statement is given followed by two conclusions numbered i and ii. You have to assume everything in the statement to be true, then consider the two conclusions together and decide which of them logically follows beyond a reasonable doubt from the information given in the statement.

Statements: One who scores more than 70% in the examination, must undergo three rounds of interview. Jhanvi scored 87% in the examination.

Conclusions:

- i) Jhanvi must undergo three rounds of interview.
- ii) Jhanvi cleared the interview.

Choose the appropriate one from the following options

- (A) Only conclusion i follows
- (B) Only conclusion ii follows
- (C) Either i or ii follows
- (D) Neither i nor ii follows
- (E) Both i and ii follow.
- (A) ☒ A (Correct Answer)
- (B) ☐ D
- (C) ☐ E (Chosen option)
- (D) ☐ B

- (D) ☐ at

Case Study - 12 to 16

5.00

Directions - Read the short passage below and answer the questions that follow.

Schizophrenia is a serious mental disorder in which people interpret reality abnormally. Schizophrenia may result in some combination of hallucinations, delusions, and extremely

disordered thinking and behaviour that impairs daily functioning, and can be disabling. People with schizophrenia require lifelong treatment. Early treatment may help get symptoms under control before serious complications develop and may help improve the long-term outlook. Schizophrenia involves a range of problems with thinking (cognition), behaviour and emotions. Symptoms may include: delusions (false belief not based on reality), hallucinations (seeing/hearing things not in existence), disorganised thinking/speech (unintelligible mixture of incomprehensible words in speech especially, **salad words**, my goodness!), abnormal motor behaviour (resistance to instructions, inappropriate or bizarre posture, a complete lack of response, or useless and excessive movement) and negative symptoms (remain, though not always, asocial). There's no sure way to prevent schizophrenia, but sticking with the treatment plan can help prevent relapses or worsening of symptoms. In addition, researchers hope that learning more about risk factors for schizophrenia may lead to earlier diagnosis and treatment.

Question No.12
