In this question, a passage and a statement related to it have been given. Read the passage carefully and criticize the statement based on it.

India invites Chinese telecom giant Huyyai Technologies - a company which has been banned by calling America as a threat to its cyber security, and security and technology establishments expressed concern in Australia and New Zealand, from which 5G networks were created to participate in 5G tests. is. Although there have been some changes in Indian conditions in the last decade but still there is not enough security measures in the telecom sector in India, which is the backbone of the digital economy. The only thing that has changed is the technology standard - earlier it was in the form of fear of using Chinese 3G devices in spyware and now Chinese 5G devices.

To address these alleged safety hazards, experts have suggested two ways that can be used by the government. First, establishment of infrastructure to test and identify the vulnerabilities of telecommunication equipment installed in the country. Second, developing the ability to build important hardware components in the country. Officials say that they have not been implemented in India so far. He also informed that the Department of Telecom had pledged to investigate the safety devices in 2013. Imports of China's telecommunications equipment increased from \$ 1.3 billion in 2014 to \$ 9.4 billion in 2017, along with various mobile phone accessories.

Statement: India has adopted both of the policies suggested by experts to protect against security threats.

Select the appropriate from the given options

A - Statement is completely true  
B-statement is probable true  
C-statement can not be determined  
D-Statement is completely false

Two statements and two conclusions have been given in this question. Assuming the truth of the statement, you have to consider both the findings and decide which conclusions are free of logic and logical and logical.

Statement: Some stems are root. All root plants are.

Conclusion:

- i) There are some stem plants.  
ii) Some plants are root.

Select the correct option from the given options.

- (A) Only conclusions i is logical  
(B) Only conclusions ii is rational  
(C) or conclusions i or ii is rational  
(D) nor the conclusions ii is rational  
(E) both the conclusions i and ii are rational

- (A)  C - (Alternative 3)  
(B)  **E - (Alternative 4)**  
(C)  B - (Alternative 2)  
(D)  A - (Alternative 1)

In this question, a passage and a statement related to it have been given. Read the passage carefully and criticize the statement based on it.

India invites Chinese telecom giant Hyyai Technologies - a company which has been banned by calling America as a threat to its cyber security, and security and technology establishments expressed concern in Australia and New Zealand, from which 5G networks were created to participate in 5G tests. is. Although there have been some changes in Indian conditions in the last

decade but still there is not enough security measures in the telecom sector in India, which is the backbone of the digital economy. The only thing that has changed is the technology standard - earlier it was in the form of fear of using Chinese 3G devices in spyware and now Chinese 5G devices.

To address these alleged safety hazards, experts have suggested two ways that can be used by the government. First, establishment of infrastructure to test and identify the vulnerabilities of telecommunication equipment installed in the country. Second, developing the ability to build important hardware components in the country. Officials say that they have not been implemented in India so far. He also informed that the Department of Telecom had pledged to investigate the safety devices in 2013. Imports of China's telecommunications equipment increased from \$ 1.3 billion in 2014 to \$ 9.4 billion in 2017, along with various mobile phone accessories.

Statement: Australia imposed a ban on hawaii technology which used to be a threat to cyber security in the use of this technology in the country.

Select the appropriate from the given options

- A - Statement is completely true  
B - The statement is possibly true  
C - the statement can not be determined  
D - Statement is completely false
