UPSC CSE 2013 (Prelims Paper-2: CSAT) Previous Year Paper (26-May-2013)

Total Time: 2 Hour   **Total Marks:** 200

Instructions

1. Test will auto submit when the Time is up.
2. The Test comprises of multiple choice questions (MCQ) with one or more correct answers.
3. The clock in the top right corner will display the remaining time available for you to complete the examination.

Navigating & Answering a Question

1. The answer will be saved automatically upon clicking on an option amongst the given choices of answer.
2. To deselect your chosen answer, click on the clear response button.
3. The marking scheme will be displayed for each question on the top right corner of the test window.

Your Personal Exams Guide

UPSC IAS PYP 2013 GS PAPER 2(CSAT)

1. Read the following passage and answer the two items that follow. Your answers to these items should be based on the passage only. Passage Ecological -research over the last quarter of the century has established the deleterious effects of habitat fragmentation due to mining, highways and such other intrusions on forests. When a large block of forests gets fragmented into smaller bits, the edges of all these bits come into contact with human activities resulting in the degradation of the entire forests. Continuity of forested landscapes and corridors gets disrupted 'affecting several extinction-prone species of wildlife. Habitat fragmentation, is therefore considered as the most serious threat to biodiversity conservation. Ad hoc grants of forest lands to mining companies coupled with rampant, illegal mining is aggravating this threat. What is the central focus of this passage? **(+2.5, -0.83)**

   a. Illegal mining in forests

   b. Extinction of wildlife

   c. Conservation of nature

   d. Disruption of habitat

---

2. What is the purpose of maintaining the continuity of forested landscapes and corridors? **(+2.5, -0.83)**

   1. Preservation of biodiversity.

   2. Management of mineral resources.

   3. Grant of forest lands for human activities.

   Select the correct answer using the codes given below:

   a. 1 and 2

b. 2 and 3

c. 1, 2 and 3

---

3. In a rare coin collection, there is one gold coin for every three non-gold coins. 10 more gold coins are added to the collection and the ratio of gold coins to non-gold coins would be 1: 2. Based on the information; the total number of corns in the collection now becomes   **(+2.5, −0.83)**

    a. 90

    b. 80

    c. 60

    d. 50

---

4. A gardener has 1000 plants: He wants to plant them in such a way that the number of rows and the number of columns remains the same. What is the minimum number of plants that he needs more for this purpose?   **(+2.5, −0.83)**

    a. 14

    b. 24

    c. 32

    d. 34

---

5. A sum of RS. 700 has to b used to give seven cash prizes to the students of a school for their overall academic performance. If each prize is RS. 20 less than its preceding prize, what is the least value of the prize?   **(+2.5, −0.83)**

a. RS. 30

b. RS. 40

c. RS. 60

d. RS. 80

---

6. Out of 120 applications for a post, 70 are male and 80 have a driver's license. What is the ratio between the minimum to maximum number of males having driver's license?   **(+2.5, −0.83)**

   a. 1 to 2

   b. 2 to 3

   c. 3 to 7

   d. 5 to 7

---

7. In a garrison, there was food for 1000 soldiers for one month. After 10 days, 1000 more soldiers joined the garrison. How long would the soldiers be able to carry on with the remaining food?   **(+2.5, −0.83)**

   a. 25 days

   b. 20 days

   c. 15 days

   d. 10 days

---

8. The tank-full petrol in Arun's motor-cycle lasts for 10 days. If he starts using 25% more everyday, how many days will the tank-full petrol last?   **(+2.5, −0.83)**

a. 5

b. 6

c. 7

d. 8

---

9. A person can walk a certain distance and drive back in six hours. He can also walk both ways in 10 hours. How much time will he take to drive both ways?   **(+2.5, -0.83)**

   a. Two hours

   b. Two and a half hours

   c. Five and a half hours

   d. Four hours

---

10. Read the following passages and answer the items that follow passage. Your answers to these items should be based on the passages only   **(+2.5, -0.83)**

    The law in many parts of the world increasingly restricts the discharge of agricultural slurry into watercourses. The simplest and often the most economically sound practice returns the material to the land as semisolid manure or as sprayed slurry. This dilutes its concentration in the environment to what might have occurred III a more primitive and sustainable type of agriculture and converts pollutant into fertilizer. Soil microorganisms decompose the organic components of sewage and slurry and most of the mineral nutrients become available to be absorbed again by the vegetation. The excess input of nutrients, both nitrogen and phosphorus - based, from agricultural runoff (and human sewage) has caused many 'healthy' oligotrophic lakes (low nutrient

concentrations, low plant productivity with abundant water weeds, and clear water) to change to eutrophic condition where high nutrient inputs lead to high phytoplankton productivity (sometimes dominated by bloom-forming toxic species). This makes the water turbid, eliminates large plants and, in the worst situations, leads to anoxia and fish kills; so called cultural eutrophication. Thus, important ecosystem services arc lost, including the provisioning service of wild-caught fish and the cultural services associated with recreation. The process of cultural eutrophication of lakes has been understood for some time. But only recently did scientists notice huge 'dead zones' in the oceans near river outlets, particularly those draining large catchment areas such as the Mississippi in North America and the Yangtze in China. The nutrient-enriched water flows through streams, rivers and lakes, and eventually to the estuary and ocean where the ecological impact may be huge, killing virtually all invertebrates and fish in areas up to 70,000 km2 in extent. More than 150 sea areas worldwide are now regularly starved of oxygen as a result of decomposition of algal blooms, fuelled particularly by nitrogen from agricultural runoff of fertilizers and sewage from large cities. Oceanic dead zones are typically associated with industrialized nations and usually lie off'- 'countries that subsidize their agriculture, encouraging farmers to increase productivity and use more fertilizer.

According to the passage, why should the discharge of agricultural slurry into watercourses be restricted?

1. Losing nutrients in this way is not a good practice economically.
2. Watercourses do not contain the microorganisms that can decompose organic components of agricultural slurry.
3. The discharge may lead to the eutrophication of water bodies.
Select the correct answer using the codes given below

a. 1 only

b. 2 and 3 only

c. 1 and 3 only

d. 1, 2 and 3

---

11. The passage refers to the conversion of "pollutant to fertilizer". What is pollutant and what is fertilizer in this context? (+2.5, −0.83)

a. Decomposed organic component of slurry is pollutant and microorganisms in soil constitute fertilizer.

b. Discharged agricultural slurry is pollutant and decomposed slurry in soil is fertilizer.

c. Sprayed slurry is pollutant and watercourse is fertilizer.

d. None of the above expressions is correct in this context.

---

12. According to the passage, what are the effects of indiscriminate use of fertilizers? (+2.5, −0.83)

1. Addition of pollutants to the soil and water.
2. Destruction decomposer of microorganisms in soil.
3. Nutrient enrichment of water bodies.
4. Creation of algal blooms.
Select the correct answer from the codes given below:

a. 1, 2 and 3 only

b. 1, 3 and 4 only

c. 2 and 4 only

d. 1, 2, 3 and 4

13. Read the following passages and answer the items that follow passage. (+2.5, -0.83)
Your answers to these items should be based on the passages only

The law in many parts of the world increasingly restricts the discharge of agricultural slurry into watercourses. The simplest and often the most economically sound practice returns the material to the land as semisolid manure or as sprayed slurry. This dilutes its concentration in the environment to what might have occurred III a more primitive and sustainable type of agriculture and converts pollutant into fertilizer. Soil microorganisms decompose the organic components of sewage and slurry and most of the mineral nutrients become available to be absorbed again by the vegetation. The excess input of nutrients, both nitrogen and phosphorus - based, from agricultural runoff (and human sewage) has caused many 'healthy' oligotrophic lakes (low nutrient concentrations, low plant productivity with abundant water weeds, and clear water) to change to eutrophic condition where high nutrient inputs lead to high phytoplankton productivity (sometimes dominated by bloom-forming toxic species). This makes the water turbid, eliminates large plants and, in the worst situations, leads to anoxia and fish kills; so called cultural eutrophication. Thus, important ecosystem services arc lost, including the provisioning service of wild-caught fish and the cultural services associated with recreation. The process of cultural eutrophication of lakes has been understood for some time. But only recently did scientists notice huge 'dead zones' in the oceans near river outlets, particularly those draining large catchment areas such as the Mississippi in North America and the Yangtze in China. The nutrient-enriched water flows through streams, rivers and lakes, and eventually to the estuary and ocean where the ecological impact may be huge, killing virtually all invertebrates and fish in areas up to 70,000 km2 in extent. More than 150 sea areas worldwide are now regularly starved of oxygen as a result of decomposition of algal blooms, fuelled particularly by nitrogen from agricultural runoff of fertilizers and sewage from large cities. Oceanic dead zones are typically associated with industrialized nations and usually lie off'- 'countries that subsidize their

agriculture, encouraging farmers to increase productivity and use more fertilizer.

What is/are the characteristics of a water body with cultural eutrophication?

1. Loss of ecosystem services

2. Loss of flora and fauna

3. Loss of mineral nutrients

Select the correct answer using the code given below:

a. 1 only

b. 1 and 2 only

c. 2 and 3 only

d. 1, 2 and 3

---

14. What is the central theme of this passage?   (+2.5, -0.83)

   a. Appropriate legislation is essential to protect the environment.

   b. Modern agriculture is responsible for the destruction of environment.

   c. Improper waste disposal from agriculture can destroy the aquatic ecosystems.

   d. Use of chemical fertilizers is undesirable in agriculture.

---

15. Passage - 2 The miseries of the world cannot be cured by physical help   (+2.5, -0.83)
   only. Until man's nature changes, his physical needs will always arise,

and miseries will always be felt, and no amount of physical help will remove them completely. The only solution of the problem is to make mankind pure. Ignorance is the mother of evil and of all the misery we sec. Let men have light, let them be pure and spiritually strong and educated; then alone will misery cease in the world. We may convert every house in the country into a charitable asylum, we may fill the land with hospitals, but human misery will continue until man's character changes. According to the passage, which of the following statements is most likely to be true as the reason for man's miseries?

a. The poor economic and social conditions prevailing in society.

b. The refusal on the part of man to change his character.

c. The absence of physical and material help from his society.

d. Ever increasing physical' needs due to changing social structure.

---

16. With reference to the passage, the following assumptions have been made: 1. The author gives primary importance to physical and material help in eradicating human misery. 2. Charitable homes, hospitals, etc. can remove human misery to a great extent. Which of the assumptions is/are valid? (+2.5, −0.83)
a. 1 only

b. 2 only

c. Both 1 and 2

d. Neither 1 nor 2

17. Consider the following figures 1, 2, 3 and 4: (+2.5, −0.83)
In the figure from 1 to 4 above, two symbols are shown to change their position in a regular direction. Following the same sequence, which one of the following will appear at the fifth stage?
a.

b.

c.

d.
18. In each item, there are two sets of figures; first four figures named problem figures and next four figures named Answer figures indicates as (1), (2), (3), (4), (5) and (6). The problem figures follow particular sequence.

(+2.5, −0.83)
(1) (2) (3) (4)

(5) (6) (7)

Which one of the following figures would logically come in the 7th position indicated above by a question mark?

a.

b.

c.

d.

---

19. There are two sets of figures namely Problem figure containing five   (+2.5, −0.83)
    figures 1, 2, 3, 4 and 5 Answer Figures (A), (B), (C) and (D) You have to
    select one figure from the answer set which will continue the same
    series as given in problem set figures

Problem Figures
a.
b.
c.
d.

---

20. Consider the following diagrams: (+2.5, −0.83)

Diagram I — Days (Y) vs Men (X)
Diagram II — Days (Y) vs Men (X)
Diagram III — Days (Y) vs Men (X)
Diagram IV — Days (Y) vs Men (X)
x men, working at constant speed, do a certain job in y days. Which one of these diagrams shows the relation between x and y?

a. diagram I

b. diagram II

c. diagram III

d. diagram IV

---

21. Consider the following matrix: (+2.5, −0.83)

3	370	7
2	224	6
1	730	X

What is the number at 'X' in the above matrix?

a. 5

b. 8

c. 9

d. 11

---

22. Four cars are hired at the rate of Rs. 6 per km plus the cost of diesel at Rs. 40 a litre. In this context, consider the details given in the following table: (+2.5, -0.83)

Car	Mileage (km/l)	Hours	Total Payment (Rs.)
A	8	20	2120
B	10	25	1950
C	9	24	2064
D	11	22	1812

Which car maintained the maximum average speed?

a. Car A

b. Car B

c. Car C

d. Car D

---

23. Examine the following three figures in which the numbers follow a specific pattern: **(+2.5, −0.83)**

The missing number (?) in the third figure above is

a. 7

b. 16

c. 21

d. 28

---

24. A cube has six numbers marked 1, 2, 3, 4, 5 and 6 on its faces. Three views of the cube are shown below: **(+2.5, −0.83)**

What possible numbers can exist on the two faces marked and respectively on the cube?

a. 2 and 3

b. 6 and 1

c. 1 and 4

d. 3 and 1

---

25. Direction for the following 5 (five) items: Study the figure given below (+2.5, −0.83)
and answer the five items that follow:

Chart Title
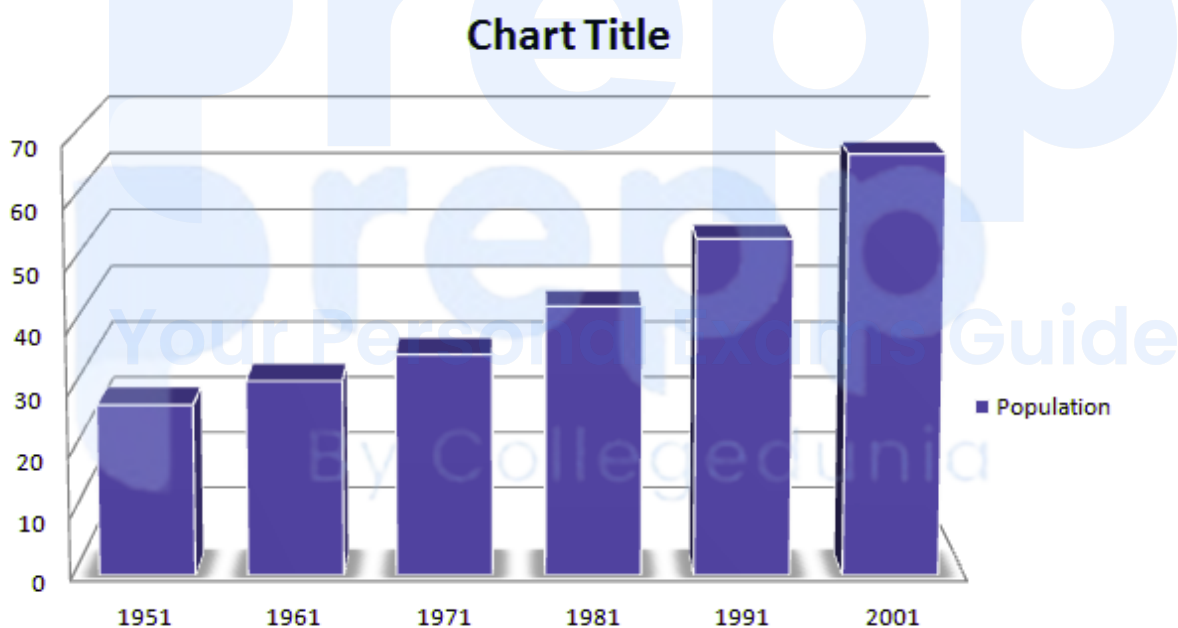

The percent increase in population from 1991 to 2001 is:

a. 24.8 Crores

b. 20 Crores

c. 13.6 Crores

d. 22.9 Crores

---

26. Direction for the following 5 (five) items: Study the figure given below   **(+2.5, -0.83)**
    and answer the five items that follow:

Chart Title
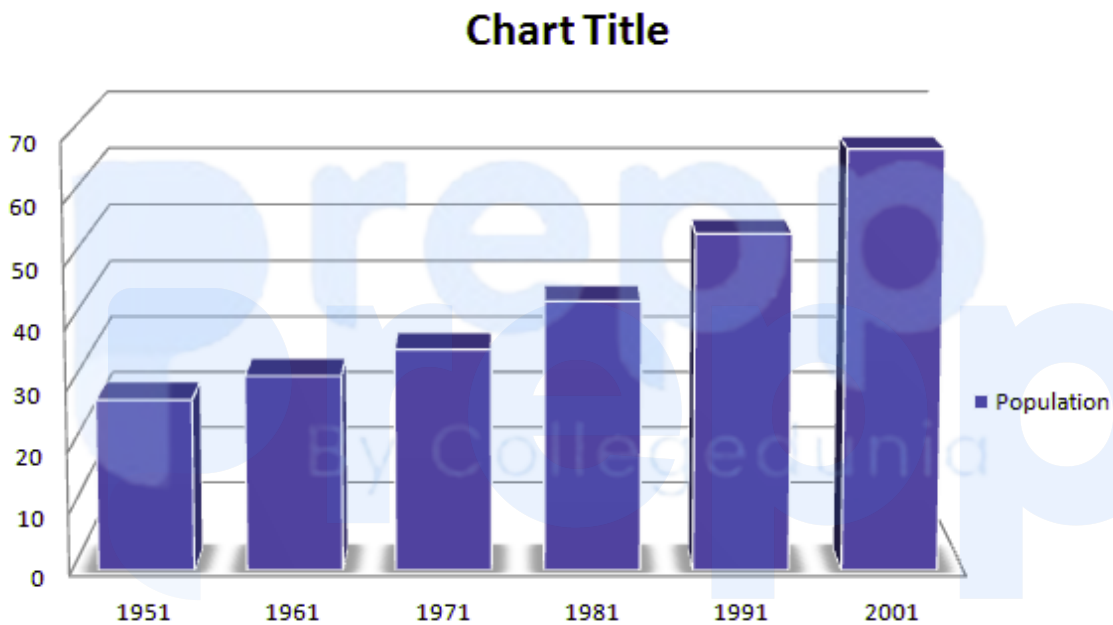

In which census year, the per cent increase in population is highest as
compared to that in the previous census year?

a. 1971

b. 1981

c. 1991

d. 2001

---

27. Direction for the following 5 (five) items: Study the figure given below   **(+2.5, -0.83)**
    and answer the five items that follow:

Chart Title

Legend: ■ Population

X-axis: 1951, 1961, 1971, 1981, 1991, 2001
In which census year, the per cent increase in population is least as compared to that in the previous census year?

a. 1971

b. 1981

c. 1991

d. 1961

---

28. If the number of female Physics professors in the age group 25 - 34 equals 25% of all the Physics professors in that age group, then what is the number of male Physics professors in the age group 25 - 34?   (+2.5, −0.83)

a. 9

b. 6

c. 3

d. 2

---

29. If the Psychology professors in the University constitute 2% of all the professors in the University, then what is the number of professors in the University?

(+2.5, -0.83)

a. 400

b. 500

c. 600

d. 700

---

30. Consider the following figures: Which one of the following figures would logically come in the 7th position indicated above by a question mark?

(+2.5, -0.83)

a. A

b. B

c. C

d. D

---

31. Directions for the following 8 (eight) items: Read the following four passages and answer the items that follow each passage. Your answers to these items should be based on the passages only. Passage -1 The subject of democracy has become severely muddled because of the way the rhetoric surrounding it has been used in recent years, There IS, increasingly, an oddly confused dichotomy between those who want to 'impose' democracy on countries In the non-Western world (in these countries' 'own interest', of course) and those who are opposed to such

(+2.5, -0.83)

'imposition' (because of the respect for the countries' 'own ways'). But the entire language of 'imposition', used by both sides, is extraordinarily inappropriate since it makes the implicit assumption that democracy belongs exclusively to the West, taking it to be a quintessentially 'Western' idea which has originated and flourished only in the West. But the thesis and the pessimism it generates about the possibility of democratic practice in the world would be extremely hard to justify. There were several experiments in local democracy in ancient India. Indeed, in understanding the roots of democracy in the world, we have to take an interest in the history of people participation and public reasoning in different parts of the world. We have to look beyond thinking of democracy only in terms of European and American evolution. We would fail to understand the pervasive demands for participatory living, on which Aristotle spoke with far-reaching insight, if we take democracy to be a kind of a specialized cultural product of the West. It cannot, of course, be doubted that the institutional structure of the contemporary practice of democracy is largely the product of European and American experience over the last few centuries. This is extremely important to recognize since these developments in institutional formats were immensely innovative and ultimately effective. There can be little doubt that there is a major 'Western' achievement here. Which of the following is closest to the view of democracy as mentioned in the above passage?

a. The subject of democracy is a muddle due to a desire to portray it as a Western concept, 'alien' to non-Western countries.

b. The language or imposition of democracy is inappropriate. There is, however, a need to consider this concept in the backdrop of culture of 'own ways' of non-Western society.

c. While democracy is not essentially a Western idea belonging exclusively to the West, the institutional structure of current democratic practices has been their contribution.

d. None of the statements (a), (b) and (c) given above is correct.

32. With reference to the passage, the following assumptions have been made: **(+2.5, –0.83)**

    1. The author gives primary importance to physical and material help in eradicating human misery.

    2. Charitable homes, hospitals, etc. can remove human misery to a great extent.

    Which of the assumptions is/are valid?

    a. 1 only

    b. 2 only

    c. Both 1 and 2

    d. Neither 1 nor 2

33. Passage - 2 Corporate governance is based on principles such as conducting the business with all integrity and fairness, being transparent with regard to all transactions, making all the necessary disclosures and decisions, complying with all the laws of the land, accountability and responsibility towards the stakeholders and commitment to conducting business in an ethical manner. Another point which is highlighted on corporate governance is the need for those in control to be able to distinguish between what are personal and corporate funds while managing a company. Fundamentally, there is a level of confidence that is associated with a company that is known to have good corporate governance. The presence of an active group of independent directors on the board contributes a great deal towards ensuring confidence m the market. Corporate governance is known to be one of the criteria that foreign institutional investors are increasingly depending on when deciding on which companies to invest in. It is also known to have a positive influence on the share price **(+2.5, –0.83)**

of the company. Having a clean image on the corporate governance front could also make it easier for companies to source capital at more reasonable costs. Unfortunately, corporate governance often becomes the centre of discussion only after the exposure of a large scam. According to the passage, which of the following should be the practice/practices in good corporate governance?

a. 1 only

b. 2 and 3 only

c. 1 and 3 only

d. 1, 2 and 3

---

34. According to the passage, which of the following is/are the major benefit/benefits of good corporate governance?   (+2.5, -0.83)

a. 1 only

b. 2 and 3 only

c. 1 and 3 only

d. 1, 2 and 3

---

35. Passage - 3 Malnutrition most commonly occurs between the ages of six months and two years. This happens despite the child's food requirements being less than that of an older child. Malnutrition is often attributed to poverty, but it has been found that even in households where adults eat adequate quantities of food, more than 50 per cent of children-under-five do not consume enough food. The child's dependence on someone else to feed him/her is primarily responsible for the malnutrition. Very often the mother is working and the   (+2.5, -0.83)

responsibility of feeding the young child is left to an older sibling. It is therefore crucial to increase awareness regarding the child's food needs and how to satisfy them. According to the passage, malnutrition in children can be reduced

a. if the children have regular intake of food.

b. after they cross the age of five.

c. if the food needs of younger children are known.

d. if the responsibility of feeding younger children is given to adults.

---

36. According to the author, poverty is not the main cause of malnutrition, but the fact that   **(+2.5, −0.83)**

a. 1 only

b. 2 only

c. Both 1 and 2

d. Neither 1 nor 2

---

37. Passage - 4 A number of empirical studies find that farmers are risk-averse, though only moderately in many cases. There is also evidence to show that farmers' risk aversion results in cropping patterns and input use designed to reduce risk rather than to maximize income. Farmers adopt a number of strategies to manage and cope with agricultural risks. These include practices like crop and field diversification, non-farm employment, storage of stocks and strategic migration of family members. There are also institutions ranging from share tenancy to kinship, extended family and informal credit agencies. One major obstacle to risk sharing by farmers is that the same type of   **(+2.5, −0.83)**

risks can affect a large number of farmers in the region. Empirical studies show that the traditional methods are not adequate. Hence there is a need for policy interventions, especially measures that cut across geographical regions. Policies may aim at tackling agricultural risks directly or indirectly. Examples of risk-specific policies arc crop insurance, price stabilization and the development of varieties resistant to pests and diseases. Policies which affect risk indirectly are irrigation, subsidized credit and access to information. No single risk-specific policy is sufficient to reduce risk and is without side-effects, whereas policies not specific to risk influence the general situation and affect risks only indirectly. Crop insurance, as a policy measure to tackle agricultural risk directly, deserves careful consideration in the Indian context and in many other developing countries because the majority of farmers depend on rain-fed agriculture and in many areas yield variability is the predominant cause of their income instability. The need for policy intervention to mitigate risks in agriculture is because

a. farmers are extremely risk-averse.

b. farmers do not know how to mitigate risks.

c. the methods adopted by farmers and existing risk sharing institutions are not adequate.

d. majority of farmers depend on rain-fed agriculture.

38. Which of the following observations emerges from the above passage?   (+2.5, -0.83)

a. One can identify a single policy that can reduce risk without any side-effect.

b. No single risk-specific policy is sufficient to reduce agricultural risk.

c. Policies which affect risk indirectly can eliminate it.

d. Government's policy intervention can mitigate agricultural risk completely.

---

39. Consider the following statements: **(+2.5, −0.83)**

I. A primary group is relatively smaller in size.

II. Intimacy is an essential characteristic of a primary group.

III. A family may be an example of a primary group. In the light of the above statements,

which one of the following is true?

a. All families are primary groups.

b. All primary groups are families.

c. A group of smaller size is always a primary group.

d. Members of a primary group know each other intimately.

---

40. Four friends, A, B, C and D distribute some money among themselves in   **(+2.5, −0.83)**
such a manner that A gets one less than B, C gets 5 more than D, D gets 3 more than B. Who gets the smallest amount?

a. A

b. B

c. C

d. D

---

41. Directions for the following 4 (four) items: Read the following statements and answer the four items that follow: Five cities P, Q, R, S and T are connected by different modes of transport as follows: P and Q are connected by boat as well as rail. Sand R are connected by bus and boat. Q and T are connected by air only. P and R are connected by boat only. T and R are connected by rail and bus. Which mode of transport would help one to reach R starting from Q, but without changing the mode of transport? **(+2.5, −0.83)**

   a. Boat

   b. Rail

   c. Bus

   d. Air

---

42. If a person visits each of the places starting from P and gets back to P, which of the following places must he visit twice? **(+2.5, −0.83)**

   a. Q

   b. R

   c. S

   d. T

---

43. Which one of the following pairs of cities is connected by any of the routes directly without going to any other city? **(+2.5, −0.83)**

   a. P and T

   b. T and S

c. Q and R

d. None of these

---

44. Between which two cities among the pairs of cities given below are there maximum travel options available? **(+2.5, −0.83)**

a. Q and S

b. P and R

c. P and T

d. Q and R

---

45. Directions for the following 3 (three) items: Read the following passage and answer the three items that follow: A tennis coach is trying to put together a team of four players for the forthcoming tournament. For this 7 players are available: males A, Band C; and females W, X, Y and Z. All players have equal capability and at least 2 males will be there in the team. For a team of four, all players must be able to play with each other. But, B cannot play with W, C cannot play with Z and W cannot play with Y. If Y is selected and B is rejected, the team will consist of which one of the following groups? **(+2.5, −0.83)**

a. A, C, Wand Y

b. A, C, X and Y

c. A, C, Y and Z

d. A, W, Y and Z

46. If B is selected and Y is rejected, the team will consist of which one of the following groups? (+2.5, −0.83)

    a. A, B, C and W

    b. A, B, C and Z

    c. A, B, C and X

    d. A, W, Y and Z

---

47. If all the three males' are selected, then how many combinations of four member teams are possible? (+2.5, −0.83)

    a. 1

    b. 2

    c. 3

    d. 4

---

48. The music director of a film wants to select four persons to work on "different aspects of the composition of a piece of music. Seven persons are available for this work; they are Rohit, Tanya, Shobha, Kaushal, Kunal, Mukesh and J aswant. Rohit and Tanya will not work together. Kunal and Shobha will not work together. Mukesh and Kunal want to work together. Which of the following is the most acceptable group .of people that can be selected by the music director? (+2.5, −0.83)

    a. Rohit, Shobha, Kunal and Kaushal

    b. Tanya, Kaushal, Shobha and Rohit

c. Tanya, Mukesh, Kunal and Jaswant

d. Shobha, Tanya, Rohit and Mukesh

---

49. Five people A, B, C, D and E are, seated about a round table, Every chair   (+2.5, −0.83)
is spaced equidistant from adjacent chairs,

I. C is seated next to A.

II. A is seated two seats from D.

III. B is not seated next to A.

Which of the following must be true?

I. D is seated next to B.

II. E is seated next to A.

Select the correct answer from the codes given below:

a. I only

b. II only

c. Both I and II

d. Neither I nor II

---

50. Directions for the following 3 (three) items: Examine carefully the   (+2.5, −0.83)
following statements and answer the three items that follow: Out of
four friends A, B, C and D, A and B play football and cricket, Band C play
cricket and hockey, A and D play basketball and football, C and D play
hockey and basketball. Who does not play hockey?

a. D

---

b. C

c. B

d. A

---

51. Who plays football, basketball and hockey?   (+2.5, −0.83)

a. D

b. C

c. B

d. A

---

52. Which game do B, C and D play?   (+2.5, −0.83)

a. Basketball

b. Hockey

c. Cricket

d. Football

---

53. Geeta is older than her cousin Meena, Meena's brother Bipin is older   (+2.5, −0.83)
than Geeta. When Meena and Bipin visit Geeta, they like to play chess.
Meena wins the game more often than Geeta. Based on the above
information, four conclusions, as given below, have been made. Which
one of these logically follows from the information given above?

a. While playing chess with Geeta and Meena, Bipin often loses.

b. Geeta is the oldest among the three.

c. Geeta hates to 10 the game.

d. Meena is the youngest of the three.

---

54. Directions for the following 4 (four) items: Read the following passage and answer the four items that follow. YOUI' answers to these items should be based on the passage only. Passage Financial markets J n India have acquired greater depth and liquidity over the years. Steady reforms since 1991 have led to growing linkages and integration of the Indian economy and its financial system with the global economy. Weak global economic prospects and continuing uncertainties the in international financial markets therefore, have had their impact on the emerging market economies. Sovereign risk concerns, particularly in the Euro area, affected financial markets for the greater part of the year, with the contagion of Greece's sovereign debt problem spreading to India and other economies by way of higher-than-normal levels of volatility. The funding constraints in international financial markets could impact both the availability and cost of foreign funding for banks and corporates. Since the Indian financial system is bank dominated, banks' ability to withstand stress is critical to overall financial stability. Indian banks, however, remain robust, notwithstanding a decline in capital to risk-weighted assets ratio and a rise in non-performing asset levels in the recent past. Capital adequacy levels remain above the regulatory requirements. The financial market infrastructure continues to function without any major disruption. With further globalization, consolidation, deregulation, and diversification of the financial system, the banking business may become more complex and riskier. Issues like risk and liquidity management and enhancing skill therefore assume greater significance. According to the passage, the financial markets in the emerging market economies including India had the adverse impact in recent years due to

(+2.5, −0.83)

a. 1 and 2 only

b. 1, 2 and 3

c. 2 and 3 only

d. 2, 3 and 4

---

55. The Indian financial markets are affected by global changes mainly due to the   (+2.5, -0.83)

a. increased inflow of remittances from abroad.

b. enormous increase in the foreign exchange reserves.

c. growing global linkages and integration of the Indian financial markets.

d. contagion of Greece's sovereign debt problem.

---

56. According to the passage, in the Indian financial system, banks' ability to with stand stress is critical to ensure overall financial stability because Indian financial system is   (+2.5, -0.83)

a. controlled by the Government of India.

b. less integrated with banks.

c. controlled by Reserve Bank of India.

d. dominated by banks.

---

57. Read the following passage and answer the four items that follow. Your answers to these items should be based on the passage only.   (+2.5, -0.83)

Financial markets in India have acquired greater depth and liquidity over the years. Steady reforms since 1991 have led to growing linkages and integration of the Indian economy and its financial system with the global economy. Weak global economic prospects and continuing uncertainties in the international financial markets therefore have had their impact on the emerging market economies. Sovereign risk concerns, particularly in the Euro area, affected financial markets for the greater part of the year, with the contagion of Greece's sovereign debt problem spreading to India and other economies by way of higher-than-normal levels of volatility.

The funding constraints in international financial markets could impact both the availability and cost of foreign funding for banks and corporates. Since the Indian financial system is bank dominated, bank's ability to withstand stress is critical to overall financial stability. Indian banks, however, remain robust, notwithstanding a decline in capital to risk-weighted assets ratio and a rise in non-performing asset levels in the recent past. Capital adequacy levels remain above the regulatory requirements. The financial market infrastructure continues to function without any major disruption. With further globalization, consolidation, deregulation, and diversification of the financial system, the banking business may become more complex and riskier. Issues like risk and liquidity management and enhancing skill therefore assume greater significance.

Risk and liquidity management assumes more importance in the Indian banking system in future due to

1. further globalization.

2. more consolidation and deregulation of the financial system.

3. further diversification of the financial system.

4. more financial inclusion in the economy.

Select the correct answer using the code given below:

a. 1, 2 and 3

b. 2, 3 and

c. 1 and 2 only

d. 3 and 4 only

---

58. There are five hobby clubs in a college viz, photography, yachting, chess, electronics and gardening. The gardening group meets every second day, the electronics group meets every third day, the chess group meets every fourth day, the yachting group meets every fifth day and the photography group meets every sixth day. How many times do all the five groups meet on the same day within 180 days?   (+2.5, -0.83)

a. 3

b. 5

c. 10

d. 18

---

59. A, B, C, D and E belong to five different cities P, Q, R, Sand T (not necessarily in that order). Each one of them comes from a different city. Further it is given that: (+2.5, -0.83)

1. Band C do not belong to Q.

2. Band E do not belong to P and R.

3. A and C do not belong to R, Sand T.

4. D and E do not belong to Q and T.

Which one of the following statements is not correct?

a. C belongs to P

b. D belongs to R

c. A belongs to Q

d. B belongs to S

---

60. Seven men, A, B, C, D, E, F and G are standing in a queue in that order. Each one is wearing a cap of a different colour like violet, indigo, blue, green, yellow, orange and red. D is able to see in front of him green and blue, but not violet. E can see violet and yellow, but not red. G can see caps of all colours other than orange. If E is wearing an indigo coloured cap, then the colour of the cap worn by F is   (+2.5, −0.83)

a. Blue

b. Violet

c. Red

d. Orange

---

61. There are some balls of red, green and yellow colour lying on a table. There are as many red balls as there are yellow balls. There are twice as many yellow balls as there are green ones. The number of red balls   (+2.5, −0.83)

a. is equal to the sum of yellow and green balls.

b. is double the number of green balls.

c. is equal to yellow balls minus green balls.

d. cannot be ascertained.

---

62. Directions for the following 2 (two) items: Read the following passage   (+2.5, −0.83)
    and answer the two items that follow. Your answers to these items
    should be based on the passage only. Passage Crude mineral oil
    comes out of the earth as a thick brown or black liquid with a strong
    smell. It is a complex mixture of many different substances, each with
    its own individual qualities. Most of them are combinations of hydrogen
    and carbon in varying proportions. Such hydrocarbons are also found
    in other forms such as bitumen, asphalt and natural gas. Mineral oil
    originates from the carcasses of tiny animals and from plants that live
    in the sea. Over millions of years, these dead creatures form large
    deposits under the sea-bed; and ocean currents cover them with a
    blanket of sand and silt. As this mineral hardens, it becomes
    sedimentary rock and effectively shuts out the oxygen, so preventing
    the complete decomposition of the marine deposits underneath. The
    layers of sedimentary rock become thicker and heavier. Their pressure
    produces heat, which transforms the tiny carcasses into crude oil in a
    process that is still going on today. Mineral oil deposits under the sea
    do not get completely decomposed because they

    a. are constantly washed by the ocean currents.

    b. become rock and prevent oxygen from entering them.

    c. contain a mixture 'of hydrogen and carbon.

    d. are carcasses of organisms lying in saline conditions.

63. Sedimentary rock leads to the formation of oil deposits because   (+2.5, −0.83)

    a. there are no saline conditions below it.

    b. it allows some dissolved oxygen to enter the dead organic matter
       below it.

c. weight of overlying sediment layers causes the production of heat.

d. it contains the substances that catalyze the chemical reactions required to change dead organisms into oil.

---

64. In a class of 45 students, a boy is ranked 20th. When two boys joined, his rank was dropped by one. What is his new rank from the end? **(+2.5, –0.83)**

a. 25th

b. 26th

c. 27th

d. 28th

---

65. A thief running at 8 km/hr is chased by a policeman whose speed is 10 km/hr. If the thief is 100 m ahead of the policeman, then the time required for the policeman to catch the thief will be **(+2.5, –0.83)**

a. 2 min

b. 3 min

c. 4 min

d. 6 min

---

66. A train travels at a certain average speed for a distance of 63 km and then travels a distance of 72 km at an average speed of 6 km/hr more than its original speed. If it takes 3 hours to complete the total journey, what is the original speed of the train in km/hr? **(+2.5, –0.83)**

a. 24

b. 33

c. 42

d. 66

---

67. Directions for the following 8 (eight), items: The following eight items (items 67 to 74) are based on three passages in English to test the comprehension of English language and therefore these items do not have Hindi version. Read each passage and answer the items that follow. English Passage - 1 Seven-year-old Jim came home from the park without his new bicycle. "An old man and a little boy borrowed it," he explained. "They are going to bring it back at four o'clock." His parents were upset that he had given his expensive new bicycle, but were secretly proud of his kindness and faith. Came four o'clock, no bicycle. The parents were anxious. But at 4:30, the door bell rang, and there stood a happy man and a boy, with the bicycle and a box of chocolates. Jim suddenly disappeared into his bedroom, and then came running out. "All right," he said, after examining the bicycle. "You can have your watch back!" When Jim came home without his bicycle, his parents   **(+2.5, -0.83)**

a. were angry with him.

b. were worried.

c. did not feel concerned.

d. were eager to meet the old man and the little boy.

---

68. Jim returned the watch to the old man and the little boy because   **(+2.5, -0.83)**

a. they gave him chocolates.

b. his father was proud of him.

c. he was satisfied with the condition of his bicycle.

d. they were late only by 30 minutes.

---

69. English Passage - 2 It was already late when we set out for the next town, which according to the map was about fifteen kilometres away on the other side of the hills. There we felt that we would find a bed for the night. Darkness fell soon after we left the village, but luckily we met no one as we drove swiftly along the narrow winding road that led to the hills. As we climbed higher, it became colder and rain began to fall, making it difficult at times to see the road. I asked John, my companion, to drive more slowly. After we had travelled for about twenty kilometres, there was still no sign of the town which was marked on the map. We were beginning to get worried. Then without warning, the car stopped and we found we had run out of petrol. The author asked John to drive more slowly because   (+2.5, −0.83)

a. the road led to the hills.

b. John was an inexperienced driver.

c. the road was not clearly visible.

d. they were in wilderness.

---

70. The travellers set out for the town although it was getting dark because   (+2.5, −0.83)

a. they were in a hurry.

b. the next town was a short distance away and was a hill-resort.

c. they were in wilderness.

d. the next town was a short distance away and promised a good rest for the night.

---

71. The travellers were worried after twenty kilo metres because

(+2.5, -0.83)

a. it was a lonely countryside.

b. they probably feared of having lost their way.

c. the rain began to fall

d. it was getting colder as they drove.

---

72. English Passage - 3 A stout old lady was walking with her basket down the middle of a street in Petrograd to the great confusion of the traffic and no small peril to herself. It was pointed out to her that the pavement was the place for foot-passengers, but she replied, "I m going to walk where I like. We've got liberty now." It did not occur to the dear lady that if liberty entitled the foot-passenger to walk down the middle of the road it also entitled the taxi-driver to drive on the pavement, and that the end of such liberty would be universal chaos. Everything would be getting in everybody else's way and nobody would get anywhere. Individual liberty would have become social anarchy. It was pointed out to the lady that she should walk on the pavement because she was

(+2.5, -0.83)

a. a pedestrian.

b. carrying a basket.

c. stout.

d. an old lady.

---

73. The lady refused to move from the middle of the street because   (+2.5, -0.83)

a. she was not afraid of being killed.

b. she felt that she is entitled to do whatever she liked.

c. she did not like walking on the pavement.

d. she was confused.

---

74. The old lady failed to realise that   (+2.5, -0.83)

a. she was not really free.

b. her liberty was not unlimited.

c. she was an old person.

d. roads are made for motor vehicles only.

---

75. Directions for the following 6 (six) items: Given below are six items. Each   (+2.5, -0.83)
item describes a situation and is followed by four possible responses.
Indicate the response you find most appropriate. Choose only one
response for each item. The responses will be evaluated based on the
level of appropriateness for the given situation. Please attempt all the
items. There is no penalty for, wrong answers for these six items. You
are the head of your office. There are certain houses reserved for the
allotment to the office staff and you have been given the discretion to
do so. A set of rules for the allotment of the houses has been laid down
by you and has been made public. Your personal secretary, who is very
close to you, comes to you and pleads that as his father is seriously ill,

he should be given priority in allotment of a house. The office secretariat that examined the request as per the rules turns down the request and recommends the procedure to be followed according to the rules. You do not want to annoy your personal secretary. In such circumstances, what would you do ?

a. Call him over to your room and personally explain why the allotment cannot be done.

b. Allot the house to him to win his loyalty.

c. Agree with the office note to show that you are not biased and that you do not indulge in favouritism.

d. Keep the file with you and not pass any orders.

76. While travelling in a Delhi-registered commercial taxi from Delhi to an adjacent city (another State), your taxi driver informs you that as he has no permit for running the taxi in that city, he will stop at its Transport Office and pay the prescribed fee of Rs. forty for a day. While paying the fee at the counter you find that the transport clerk is taking an extra fifty rupees for which no receipt is being given. You are in a hurry for your meeting. In such circumstances, what would you do?   (+2.5, −0.83)

a. Go up to the counter and ask the clerk to give back the money which he has illegally taken.

b. Do not interfere at all as this is a matter between the taxi driver and the tax authorities.

c. Take note of the incident and subsequently report the matter to the concerned authorities.

d. Treat it as a normal affair and simply forget about it.

77. A person lives in a far off village which is almost two hours by bus. The **(+2.5, -0.83)** villager's neighbour is a very powerful landlord who is trying to occupy the poor villager's land by force. You are the District Magistrate and busy in a meeting called by a local Minister. The villager has come all the way, by bus and on foot, to see you and give an application seeking protection from the powerful landlord. The villager keeps on waiting outside the meeting hall for an hour. You come out of the meeting and are rushing to another meeting. The villager follows you to submit his application. What would you do?

   a. Tell him to wait for another two hours till you come back from your next meeting.

   b. Tell him that the matter is actually to be dealt by a junior officer and that he should give the application to him.

   c. Call one of your senior subordinate officers and ask him to solve the villager's problem.

   d. Quickly take the application from him, ask him a few relevant questions regarding his problem and then proceed to the meeting.

78. There IS a shortage of sugar in your District where you are the District **(+2.5, -0.83)** Magistrate. The Government has ordered that only a maximum amount of 30 kg sugar is to be released for wedding celebrations. A son of your close friend is getting married and your friend requests you to release at least 50 kg sugar for his son's wedding. He expresses annoyance when you tell him about the Government's restrictions on this matter. He feels that since you are the District Magistrate you can release any amount. You do not want to spoil your friendship with him. In such circumstances, how would you deal with the situation?

a. Release the extra amount of sugar which your friend has requested for

b. Refuse your friend the extra amount and strictly follow the rules.

c. Show your friend the copy of the Government instructions and then persuade him to accept the lower amount as prescribed in the rules.

d. Advise him to directly apply to the allotting authority and inform him that you do not interfere in this matter.

---

79. You are in-charge of implementing the Family Planning programme in an area where there is a strong opposition to the present policy. You want to convince the residents of the need for keeping small families. What would be the best way of communicating this message?   (+2.5, −0.83)

a. By logically explaining to the residents the need for family planning to improve the health and living standards.

b. By encouraging late marriages and proper spacing of children.

c. By offering incentives for adopting family planning devices.

d. By asking people who have been sterilized or are using contraceptives to directly talk to the residents.

---

80. You are a teacher in a University and are setting a question paper on a particular subject. One of your colleagues, whose son is preparing for the examination on that subject, comes to you and informs you that it is his son's last chance to pass that examination and whether you could help him by indicating what questions are going to be in the examination. In the past, your colleague had helped you in another matter. Your colleague informs you that his son will suffer from   (+2.5, −0.83)

depression if he fails in this examination. In such circumstances, what would you do?

a. In view of the help he had given you, extend your help to him.

b. Regret that you cannot be of any help to him.

c. Explain to your colleague that this would be violating the trust of the University authorities and you are not in a position to help him.

d. Report the conduct of your colleague to the higher authorities.

Answers

1. Answer: d

   Explanation:

   Explanation:

   ---

6. Answer: c

   Explanation:

7. **Answer: d**

    Explanation:

8. **Answer: d**

    Explanation:

9. **Answer: a**

    Explanation:

10. **Answer: c**

    Explanation:

    The correct answer is '1 and 3 only'.

    Key Points

    Let us examine the given statements:

    Statement 1 is correct because discharging agricultural slurry in water directly is an economically unsound practice. This is due to the reason that agricultural waste can be returned to the soil as manure that will enrich soil quality and reduce the economic burden caused by the heavy amount of fertilizers needed for agriculture.

    Statement 2 is incorrect because the discharge of fertilizer-rich agricultural waste leads to eutrophication of water bodies. This is possible only when there are microorganisms present in water that can decompose the complex nutrients

present in the waste into a simpler form which is required for algal growth in water bodies. Also, this blocks the oxygen to fishes in water bodies and kills them.

Statement 3 is correct, as explained in the previous point.

Hence, the correct option is '1 and 3 only'.

---

11. **Answer: b**

    Explanation:

---

12. **Answer: b**

    Explanation:

---

13. **Answer: b**

    Explanation:

    Cultural eutrophication will result in loss of flora and fauna as eutrophication of water bodies do not allow oxygen to pass through it.

---

14. **Answer: c**

    Explanation:

---

15. **Answer: b**

Explanation:

---

16. Answer: d

Explanation:

---

17. Answer: b

Explanation:

The correct option is

In this sequence triangle moves anticlockwise and the other symbols moves anticlockwise but in the inner square only.

---

18. Answer: c

Explanation:

The correct option is

Circle and square comes in the alternate figure . The orientation of arrows repeats after every figures i.e figure 1 and figure 4 have orientation of arrows, similarly figure 2 and figure 5 as well figure 3 and figure 6. Therefore orientation of arrows of figure 7 must be same as that of figure 4 and figure 1.

19. **Answer: a**

Explanation:

The problem figure has 2 components. One being a square and another a hexagonal structure. Both the structures don't rotate at once. They rotate alternatively. In figures1&2 the square doesn't move whereas the hexagonal structure moves anticlockwise and in figures 2&3 the hexagonal structure is still and the square is moving clockwise. In the same pattern in the figures 4&5 the hexagon is still and it'll move anticlockwise in the next figure. The square will remain still. The only figure in the answer figures that meets the above standards is option

20. Answer: d

Explanation:

Given:

x represents the number of working men

y represents the time taken to finish the work Calculation:

As we know, The time taken to finish a work is inversely proportional to the number of persons working at it.

x ∝ 1/y ⇒ x = k/y, where k is a constant

⇒ x.y = k The above equation represents a hyperbola which is in the 4th option.

∴ Diagram IV represents the relation between x and y.

21. Answer: c

Explanation:

Logic: sum of digit of middle element = sum of digit of 1st & Last element

3 + 7 + 0 = 3 + 7 ⇒ 10 = 10

2 + 2 + 4 = 2 + 6 ⇒ 8 = 8

7 + 3 + 0 = 1 + ? ⇒ 10 = 1 + ? ⇒ 10 − 1 = ? ⇒ 9 = ?

Hence, 9 is correct answer.

22. **Answer: a**

Explanation:

Given:

Four cars are hired at the rate of Rs. 6 per km plus the cost of diesel at Rs. 40 per liter

Calculation:

Let the distance traveled by cars A, B, C, and D be a, b, c, d respectively.

For car A, total payment = 2120

$\Rightarrow 6 \times a + 40 \times (a/8) = 2120$

$\Rightarrow 11a = 2120$

$\Rightarrow a = 2120/11$

Average speed of A = $a/20 = 2120/(11 \times 20) = 9.63$

For car B, total payment = 1950

total Payment for car B = $6 \times b + 40 \times (b/10)$

$\Rightarrow 10b = 1950$

$\Rightarrow b = 195$

Average speed of 'B' = $b/25 = 195/25 = 7.8$

For C, total payment for car C = 2064

$\Rightarrow 6 \times c + 40 \times (c/9) = 2064$

$\Rightarrow c = (9 \times 1032)/47$

Average speed by C = $c/24$

$\Rightarrow$ Average speed of car C = $(9 \times 1032)/(47 \times 24) = 8.23$

For D, total payment for car D = 1812

⇒ 6 × d + 40 × (d/11) = 1812

⇒ d = (11 × 906)/53

Average speed of car D,

⇒ d/22 = 453/53 = 8.54

All speed except A are less than 9

∴ Car A maintain the maximum average speed.

---

23. Answer: b

Explanation:

The logic is:

First diagram: (14 × 12) ÷ 2 = 168 ÷ 2 = 84

Second diagram: (18 × 9) ÷ 2 = 162 ÷ 2 = 81

Similarly,

Let the missing number be 'x'.

Third diagram: (11 × x) ÷ 2 = 88

⇒ (11 × x) = 88 × 2

⇒ x = 176 ÷ 11

⇒ x = 16

Hence, '16' is the correct answer.

---

24. Answer: a

Explanation:

From the two cubes shown above, it is clear that numbers 2, 3, 4 and 6 are adjacent to 1 and the remaining number '5' is opposite to '1'.

Therefore, all numbers except '1' can be in the place of 'A' and 'B' in the dice shown below.

Only option 1 does not have number 1, while other options have number 1.

So, it is very clear that option 1, i.e., 2 and 3 are the possible numbers that can exist on the two faces marked on the cube.

Hence, '**2 and 3**' is the correct answer.

---

25. Answer: c

Explanation:

Increase in Population
= 68.40 – 54.80
= 13.6 crores

---

26. Answer: d

Explanation:

Percentage increase in 2001 = 24.8

---

27. Answer: a

Explanation:

% increase in 1971
= [(36.14 × 31.85) × 100]
= 13.47% least in all

---

28. Answer: a

Explanation:

---

29. Answer: b

Explanation:

---

30. Answer: d

Explanation:

---

31. **Answer: c**

Explanation:

---

32. **Answer: a**

Explanation:

Key Points

- Let us examine the given assumptions.
- **Assumption 1** states that the author gives primary importance to <u>physical and material help in eradicating human misery.</u>
    - However, this is **incorrect** because as mentioned in the passage, the author feels that <u>man's character is the main problem</u> behind the miseries he faces.
- **Assumption 2** is **incorrect** because the author explicitly states that we may convert every house in the country into a <u>charitable asylum</u>, create more hospitals <u>but human misery will continue until man nature changes.</u>

Therefore, the correct option is **'Neither 1 nor 2'**

---

Explanation:

---

57. Answer: a

Explanation:

The correct answer is '**1, 2 and 3**'.

Key Points

- According to the passage, *"With further globalization, consolidation, deregulation, and diversification of the financial system, the banking business may become more complex and riskier. Issues like risk and liquidity management and enhancing skill therefore assume greater significance. "*

- Therefore, in order to ensure financial stability in the Indian economy, it is important that banks **enhance their skills in risk and liquidity management.**

---

61. **Answer: b**

   Explanation:

---

62. **Answer: b**

   Explanation:

---

63. **Answer: c**

Explanation:

64. **Answer: d**

Explanation:

65. **Answer: b**

Explanation:

66. **Answer: c**

Explanation:

67. **Answer: b**

Explanation:

68. **Answer: c**

Explanation:

69. **Answer: c**

Explanation:

___

70. Answer: d

Explanation:

___

71. Answer: b

Explanation:

___

72. Answer: a

Explanation:

___

73. Answer: b

Explanation:

___

74. Answer: b

Explanation:

___

75. Answer: a

Explanation:

---

76. **Answer: c**

   Explanation:

---

77. **Answer: c**

   Explanation:

---

78. **Answer: c**

   Explanation:

---

79. **Answer: a**

   Explanation:

---

80. **Answer: b**

   Explanation:
