Good Med Abroad Is Good Med fir Home

The directorate General of Foreign Trade (DGFT) has made it mandatory for all cough syrup exporters to have their product tested and certified for quality at specified government laboratories before shipping out export orders. This is welcome. It will begin to repair the reputational damage over alleged Indian cough syrup-related deaths in some countries last year. Safeguarding quality cannot be limited to some products or to exports.

Ensuring quality is the Central Drugs Standard Control Organization's (CDSCO) responsibility, not DGFT's. Setting norms for exports is like applying a band-aid to a wound that requires stitches. CDSCO needs an overhaul. In the current fragmented system, quality and standardization are casualties. A modern, Independent, statutory regulatory system that has the capacity to provide oversight to an increasingly complex pharmaceutical industry while protecting public health and patient rights is required. CDSCO is the non-statutory regulator under the health ministry. It has no jurisdiction over State Drug Regulatory Authorities (SDRAs) that are part of state health departments. Each regulatory body acts independent of the other. This must change. The regulatory approach, too, needs to change. Shifting from an overwhelming focus on manufacturing to public health requires putting a doctor in charge, and shifting the regulator with multidisciplinary teams.

India is the third-largest pharma manufacturer, meeting 20% of global generic demand. The \$41 billion industry is estimated to grow further -\$50-65 billion by 2025, and \$120-130 billion by 2030. Ensuring all Indian pharma products meets quality standards will help with public health both at home and abroad, while growing India's pharma footprint.
