RRB Group D 2025 Question Paper (9-Aug-2026) (Shift 1)

Total Time: 1 Hour : 30 Minute **Total Marks:** 100

Instructions

1. Test will auto submit when the Time is up.
2. The Test comprises of multiple choice questions (MCQ) with one correct answers.
3. The clock in the top right corner will display the remaining time available for you to complete the examination.

Navigating & Answering a Question

1. The answer will be saved automatically upon clicking on an option amongst the given choices of answer.
2. To deselect your chosen answer, click on the clear response button.
3. The marking scheme will be displayed for each question on the top right corner of the test window.

General Science

1. According to Bohr's atomic model, which of the following statements is incorrect regarding the discrete orbits of electrons? (+1, -0.33)

   a. While revolving in discrete orbits, electrons radiate energy exponentially.

   b. Discrete orbits are also called energy levels.

   c. While revolving in discrete orbits, electrons do not radiate energy.

   d. The discrete orbits of electrons are certain allowed special orbits within the atom.

---

2. The absolute refractive index of diamond is 2.42. If the speed of light in vacuum is 3×10^8 m/s, which value best estimates the speed of light in diamond? (+1, -0.33)

   a. 1×10^8 m/s

   b. 1.24×10^8 m/s

   c. 2×10^8 m/s

   d. 1.5×10^8 m/s

---

3. A roller coaster car is at the highest point of its track and is about to descend. If the mass of the car and its passengers is doubled while keeping the height and gravity constant, what will be the gravitational potential energy at the top compared to the original scenario? (+1, -0.33)

   a. Gravitational potential energy will remain unchanged.

Your Personal Exams Guide

Download Prepp APP GET IT ON Google Play

b. Gravitational potential energy will double.

c. Gravitational potential energy will become four times.

d. Gravitational potential energy will be halved.

---

4. Why is soap less effective in hard water? (+1, -0.33)

a. Soap loses its polarity.

b. Soap evaporates faster in hard water.

c. Soap forms insoluble scum.

d. Soap becomes acidic.

---

5. Which of the following physical properties is true for metals? (+1, -0.33)

a. Metals are shiny and are good conductors of electricity.

b. Metals are solid at room temperature.

c. Metals are poor conductors of heat.

d. Metals are brittle and break easily.

---

6. A medical laboratory detects bacteria in a patient's sample. According to the historical development of the classification system, in which kingdom would bacteria have been placed immediately after the three-kingdom system was proposed? (+1, -0.33)

a. Monera

b. Protista

Prepp Download Prepp APP GET IT ON Google Play

c. Plantae

d. Animalia

---

7. Identify the incorrect statement related to nervous tissue. (+1, -0.33)

a. The cells of nervous tissue are called nephrons.

b. Axon is a single, long segment of nervous tissue.

c. Nerve impulses are signals that are transmitted along nerve fibers.

d. Nervous tissue includes the spinal cord.

---

8. If the mass of a body is doubled and the acceleration remains constant, what will be the force? (+1, -0.33)

a. Will remain the same

b. Will become four times

c. Will become half

d. Will become double

---

9. Which action taken by us can directly reduce biological magnification? (+1, -0.33)

a. Burning crop residues after harvesting

b. Reducing the use of chemical pesticides on crops

c. Washing grains thoroughly before use

d. Eating meat instead of grains

10. J.J. Thomson's experimental model proposed the discovery of _____. (+1, -0.33)

a. Electron

b. Neutron

c. Proton

d. Nucleus

11. Through which primary process does sucrose enter the phloem tissue in plants? (+1, -0.33)

a. Osmosis through a semi-permeable membrane

b. Facilitated diffusion through carrier proteins

c. Simple diffusion along the gradient

d. Active transport with energy from ATP

12. How are compressions and rarefactions formed in a sound wave traveling through the air medium? (+1, -0.33)

a. As the wave passes, particles in the air move in a spiral pattern

b. Particles in the air cluster together and spread out alternately

c. Particles in the air collide permanently and stick together

d. Particles in the air maintain equal distance at all times

Your Personal Exams Guide

13. What is the main purpose of having separate chambers in the human heart? (+1, -0.33)

a. To pump blood specifically towards the lungs for gaseous exchange

b. To provide storage for extra blood during the rest period

c. To prevent the mixing of oxygenated and carbon dioxide-rich blood

d. To maintain constant blood pressure in the systemic veins

---

14. Which common characteristic of hydrochloric acid and sodium hydroxide solutions explains both their abilities to change the pH of water and conduct electricity? (+1, -0.33)

a. Both produce ions in aqueous solution

b. Both have a pH value less than 7

c. Both turn blue litmus red

d. Both are strong acids

---

15. A student wants to design a device that generates maximum heat for a given battery and time. Which configuration should the student choose? (+1, -0.33)

a. Adding more batteries without changing resistance

b. Short-circuiting a battery with zero resistance

c. Using a resistor with very low resistance value

d. Using a resistor with the highest possible resistance value

---

16. In which SI unit is the numerical value of an object's potential energy measured? (+1, -0.33)

a. Pascal (Pa)

b. Watt (W)

c. Newton (N)

d. Joule (J)

---

17. In the food chain: Grass → Grasshopper → Frog → Snake → Eagle, the accumulation of DDT will be highest in _____. (+1, -0.33)

a. Eagle

b. Grasshopper

c. Frog

d. Grass

---

18. In the context of molecules of elements, which statement correctly explains the term atomicity? (+1, -0.33)

a. It is the number of atoms present in a molecule

b. It is the number of shells present in an atom

c. It is the number of electrons in an element

d. It is the total mass of atoms present in a molecule

19. Which of the following fundamental changes distinguishes a decomposition reaction from other types of chemical reactions? (+1, -0.33)

a. Formation of one substance from the combination of two substances

b. Breaking down of a compound into simpler substances

c. Exchange of ions in solution

d. Displacement of one element by another element

---

20. A science student is asked to explain why high biodiversity is found in the Indian landscape. Which explanation best integrates the concepts of habitat diversity and endemism? (+1, -0.33)

a. Exclusive agriculture leads to an increase in species

b. Promotes uniformity of single climate species

c. Diverse habitats create conditions for many endemic species

d. Focusing only on deserts leads to an increase in species

---

21. A patient is experiencing recurrent skin infections after severe damage to the outer body covering. Which tissue is most likely to be affected? (+1, -0.33)

a. Connective tissue

b. Muscular tissue

c. Nervous tissue

d. Epithelial tissue

22. A convex lens forms a real image at a distance of 30 cm from its optical center. The object is placed at a distance of 20 cm from the lens. Using the sign convention, what is the correct sign and value for the focal length of the lens? (+1, -0.33)

a. +60 cm

b. +12 cm

c. -60 cm

d. -12 cm

23. What does the displacement vector represent in two-dimensional motion? (+1, -0.33)

a. The path followed by the object

b. The average speed of the object

c. Change in position from the initial point to the final point

d. Distance traveled along the path

24. If two resistors of 4 Ω and 6 Ω are connected in parallel, the equivalent resistance will be _____. (+1, -0.33)

a. Between 4 Ω and 6 Ω

b. Greater than 6 Ω

c. Equal to 10 Ω

d. Less than 4 Ω

26. A car travels a certain distance at a uniform speed in 5 hours. If the speed were 10 km/hr higher, it would take 1 hour less. Find the actual speed of the car. **(+1, -0.33)**

a. 37 km/hr

b. 42 km/hr

c. 40 km/hr

d. 45 km/hr

---

27. AA' and BB' are two parallel straight lines. CC' is a transversal that intersects AA' and BB' at points D and E respectively. If ∠B'EC' = 127° and ∠CDA' = (7x - 3)°, find the value of x. **(+1, -0.33)**

a. 8

b. 6

c. 7

d. 5

---

28. If the interest is compounded half-yearly, find the compound interest obtained on a sum of ₹81,250 at an annual interest rate of 8% in 1.5 years. **(+1, -0.33)**

a. ₹10,045.10

b. ₹10,245.30

c. ₹10,345.40

d. ₹10,145.20

---

29. Given that 39^0.66 = x, 39^0.23 = y and x^z = y^2, then the value of z will be closest to which of the following? (+1, -0.33)

a. 0.12

b. 0.69

c. 0.64

d. 1.62

---

30. The length and width of a cuboid are equal and its height is 32 cm. If the volume of the cuboid is 2048 cm^3, find the surface area (cm^2) of the cuboid. (+1, -0.33)

a. 1024

b. 1225

c. 1296

d. 1152

---

31. Arvind buys an item for ₹x. He sells it to Beeru at a loss of 5%. Beeru spends ₹152 on its transportation and sells it to Meenu at a profit of 56%. If Meenu buys it for ₹1,482, then what is the value of x? (+1, -0.33)

a. 880

b. 820

c. 860

Prepp Download Prepp APP GET IT ON Google Play

d. 840

---

32. A building stands on level ground and a vertical flagpole is mounted on top of the building. From a point 30 m away from the foot of the building, the angle of elevation of the top of the building is 30°, while the angle of elevation of the top of the flagpole is 60°. Find the height of the flagpole (in m). (+1, -0.33)

a. $40/\sqrt{3}$

b. $20\sqrt{3}$

c. $40\sqrt{3}$

d. $60\sqrt{3}$

---

33. If 15, 45, 24 are the first three terms of a proportion, find the fourth term. (+1, -0.33)

a. 74

b. 72

c. 68

d. 75

---

34. The HCF and LCM of two numbers are 16 and 96 respectively. If one of these numbers is 48, find the other number. (+1, -0.33)

a. 32

b. 30

c. 28

Prepp Download Prepp APP GET IT ON Google Play

d. 34

---

35. If 1.2, 1.8, 2.7 and x are in proportion, find the value of x. (+1, -0.33)

a. 4.05

b. 3.05

c. 4.55

d. 3.55

---

36. If cotA = P/Q and A is an acute angle, find the value of 1/2 (P secA + Q cosecA)². (+1, -0.33)

a. $2(P^2 + Q^2)$

b. $(P^2 + Q^2)/2$

c. $\sqrt{(P^2 + Q^2)}$

d. $(P^2 + Q^2)$

37. Four shops I, II, III and IV have the same marked price for a cooker. Shop I offers two successive discounts of 13% and 60%, shop II offers successive discounts of 56% and 12%, shop III offers successive discounts of 60% and 28%, and shop IV offers successive discounts of 33%, 16% and 89%. Which shop is selling the cooker at the lowest price? (+1, -0.33)

a. IV

b. I

c. II

Prepp Download Prepp APP GET IT ON Google Play

d. III

---

38. A vessel contains 26 litres of milk. 13 litres of milk was taken out from this vessel and replaced with water. This process was repeated once more. How much milk is now in the vessel? (+1, -0.33)

a. 4.5 litres

b. 5.5 litres

c. 3.5 litres

d. 6.5 litres

---

39. A store increases the price of a jacket from ₹1,200 to ₹1,440, then gives a discount such that the price decreases to ₹1,296. Find the overall percentage change from the original price to the final price. (+1, -0.33)

a. 8% decrease

b. 8% increase

c. 10% decrease

d. 10% increase

---

40. Eight years from now, Rajiv's age will be twice Sumit's age. Four years ago, his age was six times Sumit's age. Find Sumit's age 10 years from now. (+1, -0.33)

a. 19 years

b. 21 years

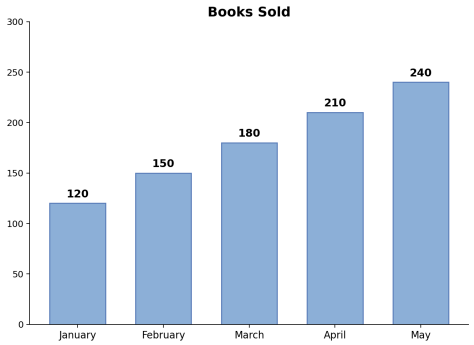

c. 17 years

Prepp Download Prepp APP GET IT ON Google Play

d. 16 years

---

41. The given bar graph shows the number of books sold by a shop in different months. What was the increase in the number of books sold from January to May? **(+1, -0.33)**

a. 120

b. 130

c. 125

d. 140

Your Personal Exams Guide

42. Find the HCF of 6, 33, 42, 114, 210. **(+1, -0.33)**

a. 3

b. 7

c. 1

d. 2

---

43. A sum of money becomes ₹56,000 in 5 years at 20% per annum simple interest. Find the sum (in ₹). **(+1, -0.33)**

Prepp Download Prepp APP GET IT ON Google Play

a. 25,000

b. 35,000

c. 28,000

d. 31,000

---

44. Three metallic cubes with edges 3 cm, 4 cm and 5 cm respectively are melted to form a large cube. Then this new cube is cut into two identical cuboids by a plane parallel to one of its faces. Find the ratio of the total surface area of the three original cubes to the total surface area of the two new cuboids. (+1, -0.33)

a. 25 : 24

b. 24 : 25

c. 5 : 4

d. 50 : 49

Your Personal Exams Guide

45. A 320 m long train moving at a speed of 62 km/hr takes 16 seconds to cross another train moving in the opposite direction on parallel tracks at a speed of 46 km/hr. Find the length of the second train (in m). (+1, -0.33)

a. 200

b. 220

c. 160

d. 180

Prepp Download Prepp APP GET IT ON Google Play

46. If the population of a city increases from 70,000 to 71,435 in one year, find the percentage increase in population. (+1, -0.33)

a. 2.15%

b. 2.25%

c. 2.05%

d. 2.00%

---

47. The marks obtained by 30 students of class X in a school in a 100-mark mathematics paper are given in the following table. Find the arithmetic mean of the data. (+1, -0.33)

Class Interval	Number of Students
10 – 25	2
25 – 40	3
40 – 55	7
55 – 70	6
70 – 85	6
85 – 100	6

General Intelligence and Reasoning

51. In a certain code language, **(+1, -0.33)**
A + B means 'A is the mother of B',
A - B means 'A is the brother of B',
A × B means 'A is the wife of B',
A % B means 'A is the father of B',
A # B means 'A is the daughter of B'. If 'Eq - Vc + Tg # Yk % Np' is true, then what is the relation of Yk with Eq?

a. Daughter of sister

b. Brother of wife

c. Husband of sister

d. Brother of mother

---

52. Refer to the following letter, number, symbol series and answer the given question. All numbers are single-digit numbers. Counting is to be done from left to right only. **(+1, -0.33)**

(Left) P C ? J 8 * \ & / W ? 3 6 R M G V R 4 T M Z J S (Right)

How many such letters are there, each of which is immediately preceded by a symbol and immediately followed by a number?

a. One

b. Nine

c. Three

d. None

Prepp Download Prepp APP GET IT ON Google Play

53. If × means −, ÷ means ×, + means ÷, − means +, then what will come in place of the question mark (?) in the following equation? (+1, -0.33)

2 ÷ 6 × 15 + 3 − 5 = ?

a. 14

b. 13

c. 15

d. 12

---

54. Priyanshu starts walking from point A and walks 17 km in the south direction. Then he turns right, walks 12 km, and then turns right again and walks 24 km. After this, he turns right again and walks 19 km. Finally, he turns right and walks 7 km and stops at point P. What distance (minimum distance) and in which direction should he walk to reach back to point A? (Unless specified, all turns are only 90-degrees.) (+1, -0.33)

a. 7 km, in the east direction

b. 7 km, in the west direction

c. 9 km, in the east direction

d. 9 km, in the west direction

---

55. In a certain code language, 'DPKA' is coded as '44' and 'QZGK' is coded as '73'. What will be the code for 'RZOI' in the given language? (+1, -0.33)

a. 88

b. 71

c. 69

d. 80

---

56. In a certain way, TQ 13 is related to YV 6. Similarly, LI 18 is related to QN 11. Following the same logic, NK 22 is related to which of the given options? (+1, -0.33)

a. TQ 13

b. SP 15

c. QN 18

d. SQ 15

---

57. Following a certain logic, 21 is related to 86. Following the same logic, 29 is related to 118. Following the same logic, 33 is related to which of the following? (Note: Operations should be performed on whole numbers without breaking the numbers into their component digits. For example, take 13, operations like adding/subtracting/multiplying etc. can be performed on 13. Breaking 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.) (+1, -0.33)

a. 130

b. 132

c. 134

d. 136

Prepp Download Prepp APP GET IT ON Google Play

58. What should come in place of the question mark (?) in the given series? (+1, -0.33)
141 118 96 75 55 ?

a. 32

b. 36

c. 46

d. 43

---

59. Based on the English alphabetical order, three of the following four letter-group pairs are alike in a certain way and thus form a group. Which letter-group pair does not belong to that group? (Note: The odd letter-group pair is not based on the number of consonants/vowels or their positions.) (+1, -0.33)

a. EF - IM

b. RS - WX

c. AB - FG

d. VW - AB

---

60. Read the given statements and conclusions carefully. You have to assume the given statements to be true, even if they seem to be at variance with commonly known facts. Which of the given conclusions logically follow from the statements. (+1, -0.33)

Statements: Some fish are whales. No whale is an octopus.

Conclusion (I): Some fish are octopuses.

Prepp Download Prepp APP GET IT ON Google Play

Conclusion (II): Some whales are fish.

a. Both conclusions I and II follow

b. Neither conclusion I nor II follows

c. Only conclusion I follows

d. Only conclusion II follows

---

61. Which letter-group should replace # and % so that the pattern and relationship followed between the letter-group pair on the left of :: is the same as the pattern and relationship followed between the letter-group pair on the right of ::? (+1, -0.33)

#: RSU :: HIK: %

a. # = NOQ , % = LKO

b. # = NOQ , % = LSD

c. # = NOQ , % = LUO

d. # = NOQ , % = LMO

---

62. S, T, U, V, Y and Z live on six different floors of the same building. The floor number of the lowest floor of the building is 1, the floor above it is 2, and so on, the top floor is 6. Only T lives above S. Y lives immediately below S. Only U lives below Z. Who lives on the third floor? (+1, -0.33)

a. Z

b. V

Prepp Download Prepp APP GET IT ON Google Play

c. S

d. U

---

63. In the following number-pairs, the second number is obtained by performing some mathematical operations on the first number. Select the set in which the numbers are related in the same way as the numbers in the following set are related. (+1, -0.33)

(Note: Operations should be performed on the whole numbers without breaking the numbers into their component digits. For example, take 13 - operations like addition/subtraction/multiplication etc. can be done on 13. Breaking 13 into 1 and 3 and then performing mathematical operations on 1 and 3 is not allowed.)

101 - 90

43 - 32

a. 47 - 37

b. 82 - 71

c. 65 - 55

d. 99 - 89

---

64. This question is based on the following words. (+1, -0.33)

FON MEN OPS PVT

In each word, each vowel is replaced by the letter immediately following it in the English alphabetical order and each consonant is replaced by the letter immediately preceding it in the English alphabetical order. How many of the letter-groups formed in this way will have no vowels?

Prepp Download Prepp APP GET IT ON Google Play

a. Nine

b. One

c. Four

d. None

---

65. If + means −, − means ×, × means ÷, ÷ means +, then what will come in place of the question mark (?) in the following equation? (+1, -0.33)

1125 − 5 ÷ 314 + 224 × 4 = ?

a. 5381

b. 5533

c. 5883

d. 5183

Your Personal Exams Guide

66. Each letter of the word CONCEPT is arranged in English alphabetical order. How many letters are there in the English alphabetical order between the fourth letter from the left and the second letter from the right in the new letter-group thus formed? (+1, -0.33)

a. 0

b. 3

c. 1

d. 2

Prepp Download Prepp APP GET IT ON Google Play

67. In a certain code language, (+1, -0.33)

A + B means 'A is the sister of B',

A - B means 'A is the brother of B',

A × B means 'A is the wife of B',

A ÷ B means 'A is the father of B'.

If 'S + E - W × T ÷ N', then what is the relation of S with N?

a. Sister

b. Mother's sister

c. Mother's mother

d. Mother

---

68. In the word COLLEGE, each vowel is replaced by the letter immediately following it in the English alphabetical order and each consonant is replaced by the letter immediately preceding it in the English alphabetical order. Which of the following letters will be at the third position from the left in the new group of letters thus formed? (+1, -0.33)

a. F

b. P

c. B

d. K

Prepp Download Prepp APP GET IT ON Google Play

69. Seven boxes I, J, K, Q, R, S and T are placed one above the other, but not necessarily in the same order. Only two boxes are placed between J and I. Only K is placed above R. Only four boxes are placed between R and I. Q is placed somewhere below S but somewhere above T. (+1, -0.33)

Which box is placed at the second position above T?

a. I

b. J

c. S

d. Q

---

70. Refer to the following letter series and answer the question given below. Counting is to be done from left to right only. (+1, -0.33)

(Left) H R I F K R L L J W K L G O Q G Q X M P U (Right)

How many consonants are there, each of which is immediately preceded by a vowel and immediately followed by a consonant?

a. None

b. One

c. Nine

d. None

---

71. Seven people D, H, J, L, S, T and Y are sitting in a row facing north. Only two people sit between S and J. Only L sits to the right of H. Only one person sits between J and H. D sits somewhere to the right of T but somewhere to the left of Y. How many people sit to the left of H? (+1, -0.33)
