Q.18	Two sets of numbers are given below. In each set of numbers, certain mathematical
	operation(s) on the first number results in the second number. Similarly, certain
	mathematical operation(s) on the second number results in the third number and so on.
	Which of the given options follows the same set of operations as in the given sets?
	(NOTE: Operations should be performed on the whole numbers, without breaking down
	the numbers into their constituent digits. E.g. 13 – Operations on 13 such as adding /
	subtracting / multiplying to 13 can be performed. Breaking down 13 into 1 and 3 and
	then performing mathematical operations on 1 and 3 is not allowed)

Ans

Q.19 Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusion(s) logically follow(s) from the statements.

Statements:

All lions are tigers. Some tigers are leopard. No leopard is giraffe.

Conclusions:

- (I) Some leopards are lions.
- (II) Some giraffe can be tigers.

Ans

- X 1. Both conclusions (I) and (II) follow
- X 2. Only conclusion (I) follows
- X 3. Either conclusion (I) or conclusion (II) follows
