Q.No: 6 **Read the following passage and answer the questions based on it:**
In addition to the historical taboo that often silenced discussions of psychological well-being, mental health awareness has evolved into an essential part of contemporary society. Creating a culture that is supportive and understanding starts with recognizing that mental health is on par with bodily health. Increasing knowledge helps de-stigmatize conditions like bipolar disorder, anxiety, and depression by encouraging people to seek treatment without feeling ashamed or afraid of being judged. It promotes early intervention, which is necessary for better long-term outcomes and successful therapy. Moreover, increasing public awareness of mental health conditions gives power to the community to offer sympathy and support to individuals experiencing challenges through informing them about symptoms, coping mechanisms, and services available. Ultimately, a society that gives a lot of emphasis to mental health awareness is one that cares about its people's overall welfare.

What is one major benefit of increasing mental health awareness?

It makes people ashamed to talk about mental health

It encourages early intervention and better long-term outcomes

It encourages people to hide their mental health issues

It discourages people from seeking treatment
