Click Here to Challenge Question No.: 19

Q.No: 19 **Read the passage and answer the following question:**

Silver ornaments have been a part of women's jewellery collections for centuries, admired for their beauty and affordability. In many cultures, wearing silver is not just a fashion statement but is also believed to have certain health benefits. Some traditional beliefs suggest that silver can help in regulating body temperature, improving blood circulation, and even protecting the wearer from infections due to its natural antibacterial properties.

However, not everyone agrees that wearing silver is entirely good. Poor quality silver or artificial alloys may cause skin allergies or rashes for people with sensitive skin. Additionally, excessive wearing of heavy silver jewellery can sometimes cause discomfort or strain, especially for women who wear large pieces for long durations.

Therefore, while silver ornaments can enhance a woman's style and may offer minor health benefits, it is important to ensure the purity of silver and wear it in moderation. Choosing good quality pieces and maintaining hygiene can help women enjoy the beauty of silver without any harmful side effects. (2 questions on grammar) unique style

In the sentence:

"Silver ornaments have been a part of women's jewellery collections for centuries..."
why is the verb "have" used instead of "has"?

Because "ornaments" is a plural subject

Because "silver" is uncountable

Because "collections" is the main subject

Because the sentence is in passive voice
