**Comprehension:**

Read the given passage and answer the following questions.

Nature can be baffling, and how! In Loktak lake, you can stand on a piece of land that floats on water. Go boating in the largest freshwater lake in the Northeast and you will come across several floating swamps which are heterogeneous masses of vegetation, soil and organic matter. In the south-western part of the lake is located Keibul Lamjao National Park, probably the world's largest floating park, which was declared a national park in 1977. If you are lucky, you might get a glimpse of the reclusive Sangai here, the endangered brow-antlered deer, also the State animal of Manipur. The Sangai is also called the dancing deer because when it moves on the floating park, it appears to dance on the waters. The construction of the Ithai Barrage for the Loktak Hydro Electric Project has altered the ecology of the lake. Designated as the Ramsar Wetland of International Importance, the lake is home to diverse flora and fauna, such as several species of aquatic plants, birds, and animals, including the Indian python. The lake is a lifeline for Manipur, especially for its fishermen.

SubQuestion No : 56

Q.5 The author opens the article with the words "Nature can be baffling, and how!" What is the tone used here?

- Ans
- 1. Tone of wonder
  - 2. Tone of confusion
  - 3. Tone of disgust
  - 4. Tone of mockery

Nature can be baffling, and how! In Loktak lake, you can stand on a piece of land that floats on water. Go boating in the largest freshwater lake in the Northeast and you will come across several floating swamps which are heterogeneous masses of vegetation, soil and organic matter. In the south-western part of the lake is located Keibul Lamjao National Park, probably the world's largest floating park, which was declared a national park in 1977. If you are lucky, you might get a glimpse of the reclusive Sangai here, the endangered brow-antlered deer, also the State animal of Manipur. The Sangai is also called the dancing deer because when it moves on the floating park, it appears to dance on the waters. The construction of the Ithai Barrage for the Loktak Hydro Electric Project has altered the ecology of the lake. Designated as the Ramsar Wetland of International Importance, the lake is home to diverse flora and fauna, such as several species of aquatic plants, birds, and animals, including the Indian python. The lake is a lifeline for Manipur, especially for its fishermen.

SubQuestion No : 59

Q.5  
9 Which event in the history of the region brought in ecological changes in the lake?

- Ans
- 1. Designation of the lake as the Ramsar Wetland of International Importance
  - 2. Declaration of the floating park as a national park.
  - 3. Construction of the Ithai Barrage for the Loktak Hydro Electric Project
  - 4. Fishing in the Loktak lake by the fishermen of the state

Question ID : 5410784869

Status : Answered

Chosen Option : 3

**Comprehension:**

Read the given passage and answer the following questions.

Nature can be baffling, and how! In Loktak lake, you can stand on a piece of land that floats on water. Go boating in the largest freshwater lake in the Northeast and you will come across several floating swamps which are heterogeneous masses of vegetation, soil and organic matter. In the south-western part of the lake is located Keibul Lamjao National Park, probably the world's largest floating park, which was declared a national park in 1977. If you are lucky, you might get a glimpse of the reclusive Sangai here, the endangered brow-antlered deer, also the State animal of Manipur. The Sangai is also called the dancing deer because when it moves on the floating park, it appears to dance on the waters. The construction of the Ithai Barrage for the Loktak Hydro Electric Project has altered the ecology of the lake. Designated as the Ramsar Wetland of International Importance, the lake is home to diverse flora and fauna, such as several species of aquatic plants, birds, and animals, including the Indian python. The lake is a lifeline for Manipur, especially for its fishermen.

SubQuestion No : 60

Q.6
